### Part I Plenary Lectures

---

<b>On the Mean Geometric Densities of Random Closed Sets, and Their Estimation: Application to the Estimation of the Mean Density of Inhomogeneous Fibre Processes</b> <i>V. Capasso and A. Micheletti</i> .....	3
<b>Synthesis of Micro and Nanoparticles from Coaxial Electrified Jets</b> <i>A. Barrero and I.G. Loscertales</i> .....	35
<b>Numerical Simulation of Induction Furnaces for Silicon Purification</b> <i>A. Bermúdez, D. Gómez, M.C. Muñiz, P. Salgado, and R. Vázquez</i> ....	48
<b>Growth and Pattern Formation for Thin Films</b> <i>R.E. Caflisch</i> .....	66
<b>On Waves in Fluids: Some Mathematical, Physical and Engineering Aspects</b> <i>L.M.B.C. Campos</i> .....	73
<b>Quantum Diffusion Models Derived from the Entropy Principle</b> <i>P. Degond, S. Gallego, F. Méhats, and C. Ringhofer</i> .....	106
<b>Statistical Aspects of Size Functions for the Description of Random Shapes: Applications to Problems of Lithography in Microelectronics</b> <i>A. Micheletti, F. Terragni, and M. Vasconi</i> .....	123

---

**Part II Minisymposia**

---

<b>Minisymposium “Flow Control in Aircrafts”</b>	
<i>A. Abbas and J.M. Vega</i> .....	137
<b>Using Non-Normality for Passive Laminar Flow Control</b>	
<i>C. Cossu, L. Brandt, J.H.M. Fransson, and A. Talamelli</i> .....	139
<b>On the Catalytic Effect of Resonant Interactions in Boundary Layer Transition</b>	
<i>X. Wu, P.A. Stewart, and S.J. Cowley</i> .....	146
<b>Stabilization of Tollmien–Schlichting Waves by Mode Interaction</b>	
<i>C. Martel, E. Valero, and J.M. Vega</i> .....	157
<b>Acoustic Streaming and Lower-than-Laminar Drag in Controlled Channel Flow</b>	
<i>P. Luchini</i> .....	169
<b>Recent Progress in the Use of Compliant Walls for Laminar Flow Control</b>	
<i>P.W. Carpenter</i> .....	178
<b>Minisymposium “Global Flow Instability”</b>	
<i>V. Theofilis</i> .....	188
<b>Helical Instability and Breakdown of a Batchelor Trailing Vortex</b>	
<i>M.S. Broadhurst and S.J. Sherwin</i> .....	191
<b>A Finite-Element Alternative for BiGlobal Linear Instability Analysis</b>	
<i>L.M. González</i> .....	196
<b>Numerical Considerations in Spectral Multidomain Methods for BiGlobal Instability Analysis of Open Cavity Configurations</b>	
<i>J. de Vicente, E. Valero, and V. Theofilis</i> .....	201
<b>Minisymposium “Analysis of Dynamical Problems in Turbomachinery”</b>	
<i>C. Martel and R. Corral</i> .....	207
<b>Modal Identification of Mistuned Bladed Discs</b>	
<i>M. Berthillier, B. Salhi, and J. Lardiès</i> .....	208

<b>Aeroelastic Instability of Low-Pressure Rotor Blades</b> <i>R. Corral and J.M. Gallardo</i> .....	214
<b>Recent Advances in Numerical Analysis of Nonlinear Vibrations of Complex Structures with Friction Contact Interfaces</b> <i>E.P. Petrov</i> .....	220
<b>Minisymposium “Numerical Methods for Conservation Laws”</b> <i>G. Russo</i> .....	225
<b>Central Runge–Kutta Schemes for Stiff Balance Laws</b> <i>G. Puppo and G. Russo</i> .....	226
<b>Flow Calculations using Shock Capturing Schemes Based on Power Limiters</b> <i>S. Serna</i> .....	231
<b>A Comparison Between Relaxation and Kurganov–Tadmor Schemes</b> <i>F. Cavalli, G. Naldi, G. Puppo, and M. Semplice</i> .....	236
<b>Minisymposium “Multibody Dynamics”</b> <i>B. Simeon</i> .....	241
<b>The Reverse Method of Lines in Flexible Multibody Dynamics</b> <i>C. Lunk and B. Simeon</i> .....	242
<b>Fast Simulation of Quasistatic Rod Deformations for VR Applications</b> <i>J. Linn, T. Stephan, J. Carlsson, and R. Bohlin</i> .....	247
<b>Simulation and Optimization of Suspension Testing Systems</b> <i>M. Speckert and K. Dreßler</i> .....	254
<b>Minisymposium “Some Topics in Astrodynamics and Space Geodesy”</b> <i>J.M. Gambi and P. Romero</i> .....	259
<b>Optimal Station Keeping for Geostationary Satellites with Electric Propulsion Systems Under Eclipse Constraints</b> <i>P. Romero, J.M. Gambi, E. Patiño, and R. Antolin</i> .....	260
<b>International Reference Systems for Astrodynamics and Space Geodesy</b> <i>M. Folgueira, N. Capitaine, and J. Souchay</i> .....	265

**Post-Newtonian Covariant Measurement Formulations  
in Space Geodesy**  
*J.M. Gambi, M.L. García del Pino, M.C. Rodríguez, M. Salas,  
and P. Romero* ..... 270

**Minisymposium “Clean Coal Conversion Technologies”**  
*C. Dopazo and P.L. Garcia-Ybarra* ..... 276

**Mathematical Modelling of Coal Particles Combustion  
in Pulverised Coal Furnaces**  
*A. Bermúdez, J.L. Ferrín, A. Liñán, and L. Saavedra* ..... 277

**Transport of Particles and Vapors in Flue Gases  
and Deposition on Cold Surfaces**  
*J.L. Castillo and P.L. Garcia-Ybarra* ..... 284

**A Comprehensive Mathematical Model of Flue-gas  
Desulfurization**  
*N. Fueyo, A. Gomez, and J.F. Gonzalez* ..... 290

**Determination of the Kinetic Parameters of a Pulverized Fuel  
from Drop Tube Experiments**  
*S. Jiménez and J. Ballester* ..... 296

**Minisymposium “Mathematical Problems in Oil Industry”**  
*A. Fasano* ..... 301

**An Asphaltene Precipitation Model Using a Lattice Approach**  
*S. Carrera* ..... 302

**Formation and Growth of Wax Deposit in the Pipelining  
of Crude Oils**  
*S. Carrera, D. Merino-Garcia, A. Fasano, and L. Fusi* ..... 307

**Simulations of the Spurt Phenomenon for Suspensions  
of Rod-Like Molecules**  
*C. Helzel* ..... 312

**Minisymposium “Flow in Porous Media”**  
*N. Svanstedt* ..... 317

**Multiscale Stochastic Homogenization  
of Convection-Diffusion Equations**  
*N. Svanstedt* ..... 318

**Numerical Approximation of Boundary Layers  
for Rough Boundaries**  
*N. Neuss* ..... 323

<b>Upscaling in Nonlinear Thermal Diffusion Problems in Composite Materials</b> <i>C. Timofte</i> .....	328
<b>Effective Two-Phase Flow Models Including Trapping Effects at the Micro Scale</b> <i>C.J. van Duijn, H. Eichel, R. Helmig, and I.S. Pop</i> .....	333
<b>Minisymposium “Shallow Water and Simulation of Environmental Flows”</b> <i>C. Parés</i> .....	340
<b>ADER DG and FV Schemes for Shallow Water Flows</b> <i>C.E. Castro and E.F. Toro</i> .....	341
<b>Numerical Simulation of Bedload Sediment Transport Using Finite Volume Schemes</b> <i>M. Castro Díaz, E.D. Fernández Nieto, and A. Ferreiro Ferreiro</i> .....	346
<b>New Trends and Applications in Oceanographic Numerical Modelling</b> <i>L. Ferrer, Ad. Uriarte, and M. González</i> .....	351
<b>Study and Development of Numerical Models for the Simulation of Geophysical Flows: The DamFlow Project</b> <i>M.J. Castro, A.M. Ferreiro, J.A. García, J.M. González, and C. Parés</i> .....	356
<b>On Variational Data Assimilation for 1D and 2D Fluvial Hydraulics</b> <i>I. Gejadze, M. Honnorat, F.X. Le Dimet, and J. Monnier</i> .....	361
<b>Minisymposium “Multiscale Problems in Materials”</b> <i>A. Carpio</i> .....	366
<b>An Asymptotic Solution of Aggregation Dynamics</b> <i>Y. Farjoun and J. Neu</i> .....	368
<b>Atomistic Simulations of the Incipient Plastic Deformation Mechanisms on Metal Surfaces</b> <i>O. Rodríguez de la Fuente</i> .....	376
<b>Critical Thickness for Misfit Dislocation Formation in InAs/GaAs(110) Heteroepitaxy</b> <i>I. Plans, A. Carpio, L.L. Bonilla, and R.E. Caflisch</i> .....	381
<b>Discrete Dislocation Dynamics in Crystals</b> <i>M.P. Ariza, A. Ramasubramaniam, and M. Ortiz</i> .....	387

<b>Interconnection of Continuum and Discrete Models of Dislocation Pile-ups</b> <i>R.E. Voskoboïnikov, S.J. Chapman, and J.R. Ockendon</i> .....	392
<b>Simplified <math>P_N</math> Models and Natural Convection–Radiation</b> <i>R. Pinnau and M. Seaid</i> .....	397
<b>Minisymposium “Nonlinear Charge and Spin Transport in Semiconductor Nanostructures”</b> <i>G. Platero</i> .....	402
<b>Electronic Transport in Nanowires at Different Length Scales</b> <i>A.-P. Jauho</i> .....	404
<b><math>SU(4)</math> Kondo Effect in a Mesoscopic Interferometer</b> <i>R. López</i> .....	421
<b>Josephson Effect and Magnetic Interactions in Double Quantum Dots</b> <i>F.S. Bergeret, A. Levy Yeyati, and A. Martín-Rodero</i> .....	426
<b>Quantum Shuttle: Physics of a Numerical Challenge</b> <i>A. Donarini</i> .....	431
<b>Microscopical Model for Hyperfine Interaction in Electronic Transport Through Double Quantum Dots: Spin Blockade Lifting</b> <i>J. Iñarrea, G. Platero, and A.H. MacDonald</i> .....	440
<b>Rabi Dynamics in Driven Tunneling Devices</b> <i>R. Sánchez and G. Platero</i> .....	444
<b>Quantum-Transmitting-Boundary Algorithm with Local Spin–Orbit Coupling</b> <i>L. Serra and D. Sánchez</i> .....	449
<b>Spintronic Transport in II–VI Magnetic Semiconductor Resonant Tunneling Devices</b> <i>D. Sánchez</i> .....	454
<b>Hysteretic Linear Conductance in Single Electron Transport through a Single Atom Magnet</b> <i>J. Fernández-Rossier and R. Aguado</i> .....	460
<b>Minisymposium “Ferromagnetic Carbon Nanostructures”</b> <i>T. Makarova and M.A.H. Vozmediano</i> .....	466
<b>Ferromagnetic Carbon Nanostructures</b> <i>T.L. Makarova</i> .....	467

<b>Looking for Ferromagnetic Signals in Proton-Irradiated Graphite</b> <i>M.A. Ramos, A. Asenjo, M. Jaafar, A. Climent-Font, A. Muñoz-Martín, J. Camarero, M. García-Hernandez, and M. Vázquez</i> .....	477
<b>Ferromagnetism and Disorder in Graphene</b> <i>M.P. López-Sancho, M.A.H. Vozmediano, T. Stauber, and F. Guinea</i> ...	483
<b>Topological Defects and Electronic Properties in Graphene</b> <i>A. Cortijo and M.A.H. Vozmediano</i> .....	488
<b>Transport Through a Graphene Transistor</b> <i>F. Guinea, A.H. Castro Neto, and N.M.R. Peres</i> .....	494
<b>Minisymposium “PDAE Modelling and Multiscale Simulation in Microelectronics and New Technologies”</b> <i>G. Ali and R. Pulch</i> .....	499
<b>Domain Decomposition Techniques for Microelectronic Modeling</b> <i>G. Ali, M. Culpó, and S. Micheletti</i> .....	500
<b>A Concept for Classification of Partial Differential Algebraic Equations in Nanoelectronics</b> <i>A. Bartel and R. Pulch</i> .....	506
<b>Numerical Simulation of a Class of PDAEs with a Separation of Time Scales</b> <i>B. Chachuat and P.I. Barton</i> .....	512
<b>Model Order Reduction for Nonlinear Differential Algebraic Equations in Circuit Simulation</b> <i>T. Voss, A. Verhoeven, T. Bechtold, and J. ter Maten</i> .....	518
<b>Minisymposium “Numerical Methods for Semiconductor Kinetic Equations (COMSON Minisymposium)”</b> <i>A. Majorana</i> .....	524
<b>Comparing Kinetic and MEP Model of Charge Transport in Semiconductors</b> <i>A. Majorana and V. Romano</i> .....	525
<b>A Deterministic Solver to the Boltzmann-Poisson System Including Quantization Effects for Silicon-MOSFETs</b> <i>M. Galler and F. Schürerer</i> .....	531

**Minisymposium of the ECMI SIG “Shape and Size in Medicine, Biotechnology and Material Sciences”**  
*A. Micheletti* ..... 537

**Size Functions Applied to the Statistical Shape Analysis and Classification of Tumor Cells**  
*A. Micheletti and G. Landini* ..... 538

**A Mathematical Morphology Approach to Cell Shape Analysis**  
*J. Angulo* ..... 543

**Reconstruction of Transducer Pressure Fields from Schlieren Data**  
*R. Kowar* ..... 548

**Plant Growth Modeling**  
*N. Morozova, N. Bessonov, and V. Volpert* ..... 553

**Minisymposium “New Trends in the Analysis of Functional Genomics Data”**  
*J.M. Carazo and A. Pascual* ..... 559

**Bayesian Classifiers with Consensus Gene Selection: A Case Study in the Systemic Lupus Erythematosus**  
*R. Armañanzas, B. Calvo, I. Inza, P. Larrañaga, I. Bernales, A. Fullaondo, and A.M. Zubiaga* ..... 560

**The Quest for Biological Significance**  
*A. Sánchez and J.L. Mosquera* ..... 566

**Functional Classification of Genes Using Non-Negative Independent Component Analysis**  
*M. Chagoyen, H. Fernandes, J.M. Carazo, and A. Pascual-Montano* ... 571

**New Trends in the Analysis of Functional Genomic Data**  
*D. Montaner, F. Al-Shahrour, and J. Dopazo* ..... 576

**Minisymposium: “Inverse Problems and Applications”**  
*O. Dorn and M. Moscoso* ..... 581

**A Robustness Analysis of the Iterative Multi-Scaling Approach Integrated with Morphological Operations**  
*D. Franceschini, M. Donelli, R. Azaro, and A. Massa* ..... 582

**Iterative Microwave Inversion Algorithm Based on the Adjoint-Field Method for Breast Cancer Application**  
*O. Dorn, M. El-Shenawee, and M. Moscoso* ..... 587

<b>Iterative Microwave Inversion for Breast Cancer Detection Using Level Sets</b> <i>N. Irishina, M. Moscoso, and O. Dorn</i> .....	592
<b>Characterization of Reservoirs by Evolving Level Set Functions Obtained from Geostatistics</b> <i>R. Villegas, O. Dorn, M. Moscoso, and M. Kindelan</i> .....	597
<b>Reconstruction of Simple Geometric Objects in 3D Optical Tomography Using an Adjoint Technique and a Boundary Element Method</b> <i>A. Zacharopoulos, O. Dorn, S.R. Arridge, V. Kolehmainen, and J. Sikora</i> .....	603
<b>High Contrast Electrical Impedance Imaging</b> <i>N. Polydorides</i> .....	608
<b>Minisymposium “Finance” (Oxford)</b> <i>S. Howison and K. Schmitz</i> .....	613
<b>Pricing Exotic Options Using Strong Convergence Properties</b> <i>K. Schmitz Abe and M. Giles</i> .....	614
<b>Credit Contagion in a Structural Framework</b> <i>H. Haworth</i> .....	630
<b>The Valuation of Elementary Exotics with Strike Resets</b> <i>E.C.K. Yu</i> .....	637
<b>Minisymposium “On Optimal Strategies of Multivariate Passport Options”</b> <i>J. Kampen</i> .....	643
<b>Foresight Bias and Suboptimality Correction in Monte–Carlo Pricing of Options with Early Exercise</b> <i>C.P. Fries</i> .....	645
<b>On the American Option Value Near its Exercise Region</b> <i>E. Chevalier</i> .....	650
<b>Free Boundary Problems in Mathematical Finance</b> <i>J. Chadam</i> .....	655
<b>Optimal Strategies of Passport Options</b> <i>J. Kampen</i> .....	666
<b>Minisymposium “Meshfree Methods for the Solution of PDEs”</b> <i>M. Kindelan</i> .....	671

<b>Solving One-Dimensional Moving-Boundary Problems with Meshless Method</b> <i>L. Vrankar, E.J. Kansa, G. Turk, and F. Runovc</i> .....	672
<b>Meshless Simulation of Hele-Shaw Flow</b> <i>F. Bernal and M. Kindelan</i> .....	677
<b>Minisymposium: “Mathematical Models for the Textile Industry”</b> <i>T. Götz</i> .....	683
<b>Dynamics of Curved Viscous Fibers</b> <i>S. Panda, N. Marheineke, and R. Wegener</i> .....	685
<b>Modeling and Simulation of Non-Woven Processes</b> <i>M. Günther, R. Wegener, and F. Olawsky</i> .....	691
<b>Asymptotics of Fiber Spinning Equations</b> <i>T. Götz, A. Klar, and A. Unterreiter</i> .....	697
<b>Three-Dimensional Elastica for Modelling Fibre Assemblies</b> <i>R.B. Ramgulam and P. Potluri</i> .....	703
<b>Effective Properties of Nonwoven Textiles from Microstructure Simulations</b> <i>A. Wiegmann</i> .....	708
<b>Minisymposium “Approximate Algebraic Techniques for Curves and Surfaces”</b> <i>B. Jüttler</i> .....	713
<b>Computing the Intersection Curve Between a Plane and the Offset of a Parametric Surface</b> <i>F. Carreras, L. Gonzalez-Vega, and J. Puig-Pey</i> .....	714
<b>Approximating Offsets of Surfaces by using the Support Function Representation</b> <i>J. Gravesen, B. Jüttler, and Z. Šír</i> .....	719
<b>Semantic Modelling for Styling and Design</b> <i>C.E. Catalano, V. Cheutet, F. Giannini, B. Falcidieno, and J.C. Leon</i> .....	724
<b>Minisymposium “Web-based Learning Environments in Applied Mathematics”</b> <i>M. Heiliö</i> .....	729

XVIII Contents

<b>An Industrial Application of an Integrated Framework for Production of Interactive Documents</b> <i>G.M. Grasso, C.L.R. Milazzo, and S. Runci</i> . . . . .	731
<b>An e-Learning Platform for Applications of Mathematics to Microelectronic Industry</b> <i>G. Alì, E. Bilotta, L. Gabriele, P. Pantano, and R. Servidio</i> . . . . .	736
<b>Web Based System for Graduate Studies: Optimization, Games, and Markets</b> <i>M. Heiliö and J. Mockus</i> . . . . .	741
<b>Web-Tool on Differential Equations</b> <i>P. Müdla</i> . . . . .	746

---

**Part III Contributed Papers**

---

<b>Model and Method to Increase the Thermal Efficiency of Micro-Heat Exchangers for Aerospace Applications</b> <i>A. Velazquez, J.R. Arias, and B. Mendez</i> . . . . .	753
<b>Influence of Trailing Jet Instability on the Dynamics of Starting Jets</b> <i>C. Marugan-Cruz, M. Vera, C. Martinez-Bazan, and G. Pawlak</i> . . . . .	758
<b>Modelling and Computational Analysis of the Dynamic Crash Behaviour of Fabric Reinforced Composite Automotive Structures</b> <i>E.V. Morozov and V.A. Thomson</i> . . . . .	763
<b>Theoretical Modeling of Flame–Acoustic Interaction</b> <i>M.L. Bondar, J.H.M. ten Thije Boonkkamp, and R.M.M. Mattheij</i> . . . . .	768
<b>Air-Blown Rivulet Flow of a Perfectly Wetting Fluid on an Inclined Substrate</b> <i>J.M. Sullivan, S.K. Wilson, and B.R. Duffy</i> . . . . .	774
<b>The Effect of the Thermal Conductivity of the Substrate on Droplet Evaporation</b> <i>G.J. Dunn, S.K. Wilson, B.R. Duffy, S. David, and K. Sefiane</i> . . . . .	779
<b>The Effect of Particles on Linear and Weakly Nonlinear Instability of a Two-Phase Shallow Flows</b> <i>A. Kolyshkin and S. Nazarovs</i> . . . . .	784
<b>Water Quality Simulation of a Future Pit Lake</b> <i>A. Bermúdez, L.M. García García, P. Quintela, and J.L. Delgado</i> . . . . .	790

<b>Optimal Management and Design of a Wastewater Purification System</b> <i>L.J. Alvarez-Vázquez, E. Balsa-Canto, and A. Martínez</i> .....	795
<b>Estimation of Fuzzy Anomalies in Water Distribution Systems</b> <i>J. Izquierdo, M.M. Tung, R. Pérez, and F.J. Martínez</i> .....	801
<b>Investigation of the Evolution and Breakup of Electrically Charged Drops</b> <i>S.I. Betel, M.A. Fontelos, U. Kindelán, and O. Vantzos</i> .....	806
<b>Homogeneous Nucleation of Dipole Domains and Current Self-Oscillations in Photoexcited Semiconductor Superlattices</b> <i>J.I. Arana and L.L. Bonilla</i> .....	812
<b>Numerical Analysis of a Nickel-Iron Electrodeposition Process</b> <i>N. Alaa, M. Iguernane, and J.R. Roche</i> .....	817
<b>A Simplified Finite Element Formulation for Spray Transfer GMA Weld Pools</b> <i>M. Edstorp</i> .....	822
<b>Numerical Solution of a Non-Local Elliptic Problem Modeling a Thermistor with a Finite Element and a Finite Volume Method</b> <i>C.V. Nikolopoulos and G.E. Zouraris</i> .....	827
<b>Numerical Solution of 3D Magnetostatic Problems in Terms of Scalar Potentials</b> <i>A. Bermúdez, R. Rodríguez, and P. Salgado</i> .....	833
<b>Optimization Methods for a Wifi Location System</b> <i>A. Martínez, L.J. Alvarez-Vázquez, F. Aguado-Agelet, and E. Balsa-Canto</i> .....	838
<b>Flow in the Canal of Schlemm and its Influence on Primary Open Angle Glaucoma</b> <i>A.D. Fitt</i> .....	843
<b>A One-Phase Model for Air-Breathing DMFC Cells with Non-Tafel Kinetics</b> <i>M. Vera and F.J. Sánchez-Cabo</i> .....	848
<b>Optimising Design Parameters of Enzyme-Channelling Biosensors</b> <i>D. Mackey and A.J. Killard</i> .....	853

<b>Breast Nodule Ultrasound Segmentation Through Texture-Based Active Contours</b> <i>M. Alemán-Flores, L. Álvarez, and V. Caselles</i> .....	858
<b>A Contrast Invariant Approach to Motion Estimation: Validation and Application to Motion Estimation Improvement</b> <i>V. Caselles, L. Garrido, and L. Igual</i> .....	863
<b>A Mathematical Model for Prediction of Recurrence in Bladder Cancer Patients</b> <i>C. Santamaría, M.B. García-Mora, G. Rubio, and J.L. Pontones</i> .....	868
<b>Use of the Fourier Transform in the Distributions Sense for Creation Numerical Algorithms for Cone-Beam Tomography</b> <i>O.E. Trofimov</i> .....	873
<b>Shapley Value vs. Proportional Rule in Cooperative Affairs</b> <i>R. Amer, F. Carreras, and A. Magaña</i> .....	877
<b>A Wide Family of Solutions Based on Marginal Contributions for Situations of Competence–Cooperation with Structure of a Priori Coalition Blocks</b> <i>J.M. Giménez</i> .....	882
<b>Time-Varying Grids for Gas Dynamics</b> <i>F. Coquel, Q.L. Nguyen, M. Postel, and Q.H. Tran</i> .....	887
<b>Meshless Poisson Problems in the Finite Pointset Method: Positive Stencils and Multigrid</b> <i>B. Seibold</i> .....	892
<b>Basics of a Differential-Geometric Approach to Diffusion: Uniting Lagrangian and Eulerian Models on a Manifold</b> <i>M.M. Tung</i> .....	897
<b>Diagnostic Modelling of Digital Systems with Binary and High-Level Decision Diagrams</b> <i>R. Ubar, J. Raik, H. Kruus, H. Lensen, and T. Evertson</i> .....	902
<b>Numerical Integration in Bayesian Positioning</b> <i>H. Pesonen and R. Piché</i> .....	908
<b>Singular Problems With Quadratic Gradient Term</b> <i>A. Vitolo</i> .....	913
<b>Pattern Matching for Control Chart Monitoring</b> <i>D. Cantone and S. Faro</i> .....	918

<b>Index Characterization in DAE Circuit Models Without Passivity Assumptions</b> <i>A.J. Encinas and R. Riaza</i> .....	923
<b>Fingerprint Classification using Entropy Sensitive Tracing</b> <i>P. Mihăilescu, K. Mieloch, and A. Munk</i> .....	928
<b>An Invariant Domain Preserving MUSCL Scheme</b> <i>C. Berthon</i> .....	933
<b>A Stable CE–SE Numerical Method for Time-Dependent Advection–Diffusion Equation</b> <i>R. Company, E. Defez, L. Jódar, and E. Ponsoda</i> .....	939
<b>A Random Euler Method for Solving Differential Equations with Uncertainties</b> <i>J.C. Cortés, L. Jódar, and L. Villafuerte</i> .....	944
<b>Cubic-Matrix Splines and Second-Order Matrix Models</b> <i>M.M. Tung, L. Soler, E. Defez, and A. Hervás</i> .....	949
<hr/>	
<b>Part IV Color Plates</b>	
<b>Color Plates</b> .....	957
<hr/>	
<b>Part V Contributor Index</b>	
<b>List of Contributors</b> .....	985
