Part I Basics

1	Pre- and Postinterventional Imaging	3
	<i>M. Katoh, G. Schneider and A. Bucker</i>	
1.1	Introduction	3
1.2	Materials and Techniques	4
1.2.1	Preinterventional CT Imaging	4
1.2.2	Postinterventional CT Imaging	6
1.2.3	Preinterventional MR Imaging	6
1.2.4	Postinterventional MR Imaging	8
	References	9
2	CT-Guided Interventions – Indications, Technique, Pitfalls	11
	<i>P.G.C. Begemann</i>	
2.1	Introduction	11
2.2	Materials and Techniques	14
2.2.1	General Equipment	14
2.2.2	Desirable Equipment	14
2.2.3	CT-Guided Puncture – Step by Step	16
2.2.4	Pitfalls	18
2.2.5	Radiation Dose	20
	References	20
3	MR-Guided Interventions – Indications, Technique, Pitfalls	21
	<i>A. Bucker and M. Katoh</i>	
3.1	Introduction	21
3.2	Materials and Techniques	21
3.2.1	MR Scanner	21
3.2.2	Imaging Sequence – General Considerations	22
3.2.3	Imaging Sequence – How to Influence the Appearance of Metallic Instruments and Susceptibility Artifacts	24
3.2.4	Imaging Sequence – Dedicated Temperature Measurements	27

3.3	Indications	28
	References	31
4	Radiation Protection During CT-Guided Interventions	35
	<i>K. Jungnickel</i>	
4.1	Introduction	35
4.2	Dose Considerations	35
4.2.1	Patient Dose	35
4.2.2	Operator Dose	36
4.3	Radiation Protection in General	36
4.4	Radiation Protection by Technical Means	37
4.5	Radiation Protection of the Interventionalist	37
	References	38
5	Medical Management of the Patient	39
	<i>D. Henzler and M. Murphy</i>	
5.1	Introduction	39
5.2	Materials and Techniques	39
5.2.1	Monitoring	39
5.2.2	Sedation	42
5.3	Medical Management	45
5.3.1	Preparations	45
5.3.2	Conduct of Sedation	46
5.3.3	Adjunctive Treatment	47
5.3.4	Postsedation Care	48
5.3.5	Special Considerations in Children	49
5.3.6	Emergency Care	51
	References	54
6	Ways to the Target	55
	<i>A. Lubienski</i>	
6.1	Introduction	55
6.2	Materials and Techniques	55
6.2.1	Patient's Position	55
6.2.2	Planning of the Access Route	56
6.2.3	Local Anesthesia	56
6.2.4	Puncture Technique	56
6.3	Special Techniques	57
6.3.1	Lung	57
6.3.2	Mediastinum	58
6.3.3	Liver	59
6.3.4	Gallbladder and Spleen	59
6.3.5	Pancreas	61
6.3.6	Kidney	62
6.3.7	Adrenal Gland	62
6.3.8	Retroperitoneum and Peritoneal Cavity	62
6.3.9	Pelvis	63
6.3.10	Bone	64

6.3.11	Miscellaneous	65
	References	67
7	Navigated Interventions – Techniques and Indications	69
	<i>G. Widmann and R. Bale</i>	
7.1	Indications	69
7.2	Materials and Techniques	69
7.2.1	Material Available/Needed	69
7.2.2	Technique	71
7.3	Results	74
7.4	Complications	74
	References	76
8	Special Considerations for Image-Guided Interventions in Pediatric Patients	79
	<i>D. Honnef</i>	
8.1	Introduction	79
8.2	Materials and Techniques	79
8.2.1	Preparation	79
8.2.2	Computed Tomography	81
8.2.3	Magnetic Resonance Imaging	81
8.2.4	Biopsy	81
8.2.5	Localization Techniques	82
8.2.6	Drainage	82
8.2.7	Other Therapeutic Procedures	83
8.3	Results	84
8.3.1	Biopsy	84
8.3.2	Localization Techniques	85
8.3.3	Drainage	85
8.3.4	Other Therapeutic Interventions	86
	References	87
Part II Diagnostic Interventions		
9	Biopsy	91
	<i>C.G. Trumm and R.-T. Hoffmann</i>	
9.1	Introduction	91
9.2	Patient Preparation and Aftercare	91
9.3	CT and CT-Fluoroscopic Guidance	92
9.3.1	Sequential CT Guidance	93
9.3.2	CT-Fluoroscopic Guidance	94
9.4	CT-Guided Aspiration Biopsy	94
9.4.1	Indications	94
9.4.2	Material	94
9.4.3	Technique	95
9.4.4	Results	99
9.4.5	Complications	102
9.5	CT-Guided Punch Biopsy	103
9.5.1	Indications	103

9.5.2	Material	103
9.5.3	Technique	104
9.5.4	Results	105
9.5.5	Appraisal	107
9.6	CT-Guided Drill Biopsy	107
9.6.1	Indications	107
9.6.2	Material	107
9.6.3	Technique	108
9.6.4	Results	111
9.6.5	Complications	112
9.6.6	Appraisal	112
9.7	MR-Guided Biopsy	112
9.7.1	Indications	113
9.7.2	Material	113
9.7.3	Technique	114
9.7.4	Results	114
9.7.5	Complications	115
	References	115
10	MR-Guided Breast Biopsy	119
	<i>U. Preim</i>	
10.1	Introduction	119
10.2	Indications	119
10.3	Material	120
10.4	Technique	120
10.5	Results	121
10.6	Complications	122
	References	123
11	Drainage	125
11.1	Drainage in Abscess	125
	<i>R. Fischbach</i>	
11.1.1	Introduction	125
11.1.2	Diagnosing Abscess	126
11.1.3	Indications and Contraindications	127
11.1.4	Material	127
11.1.5	Technique	129
11.1.6	Results	137
11.1.7	Complications	137
	References	138
11.2	Drainage in Pneumothorax	139
	<i>C. Hohl</i>	
11.2.1	Indications	139
11.2.2	Material	139
11.2.3	Technique	140
11.2.4	Results	143
11.2.5	Complications	143
	References	143

11.3	Nephrostomy	143
	<i>C. Hohl</i>	
11.3.1	Indications	143
11.3.2	Material	144
11.3.3	Technique	144
11.3.4	Results	146
11.3.5	Complications	147
	References	148
12	Localization Techniques	151
	<i>U. Redlich</i>	
12.1	Indications	151
12.2	Material	152
12.3	Technique	152
12.4	Results	154
12.5	Complications	154
	References	154
 Part III Therapeutic Interventions		
13	Interventional Oncology	159
13.1	Radiofrequency Ablation	159
13.1.1	Radiofrequency Ablation – Technical Basics	159
	<i>S. Clasen and P.L. Pereira</i>	
13.1.2	RF Ablation of Liver Tumors	167
	<i>A. Lubienski</i>	
13.1.3	RF Ablation of Lung Tumors	186
	<i>A.-O. Schäfer</i>	
13.1.4	Renal RF Ablation	198
	<i>A.H. Mahnken</i>	
13.1.5	RF Ablation – Miscellaneous	207
	<i>T. Helmberger</i>	
13.2	Laser-Induced Thermography	212
13.2.1	Temperature Mapping for MR-Guided LITT	212
	<i>T.J. Vogl, K. Eichler, T. Lehnert, M. Mack, and D. Meister</i>	
13.2.2	Laser Ablation – Liver and Beyond	218
	<i>M.G. Mack et al.</i>	
13.2.3	Laser Ablation – Lung	231
	<i>C. Rosenberg and N. Hosten</i>	
13.3	Percutaneous Ethanol Injection	240
	<i>M. Düx</i>	
13.3.1	Introduction	240
13.3.2	Indications	240
13.3.3	Material and Technique	241
13.3.4	Results	247
13.3.5	Complications	248
	References	248

13.4	CT-Guided HDR Brachytherapy	250
	<i>K. Mohnike and J. Ricke</i>	
13.4.1	Indications	250
13.4.2	Material and Technique	250
13.4.3	Dose Considerations	251
13.4.4	Results	253
13.4.5	Complications	254
	References	255
13.5	High Intensity Focused Ultrasound	255
13.5.1	Technical Basics of MR-Guided Focused Ultrasound Surgery . .	255
	<i>A. Beck and S. Hengst</i>	
13.5.2	Clinical Application of MR-Guided Focused Ultrasound Surgery	259
	<i>S. Hengst and A. Beck</i>	
14	Interventional Pain Management	265
14.1	Neurolysis of the Facet Joint	265
	<i>J. Hoeltje and R. Bruening</i>	
14.1.1	Introduction	265
14.1.2	Indications	266
14.1.3	Material	267
14.1.4	Technique	267
14.1.5	Results	268
14.1.6	Complications	269
	References	269
14.2	Image-Guided Nerve Blocs and Infiltrations in Pain Management	270
	<i>B. Kastler</i>	
14.2.1	Introduction	270
14.2.2	Materials and Techniques – General Considerations	271
14.2.3	Materials and Techniques – Detailed Considerations	273
	References	287
14.3	Thoracic and Lumbar Sympathicolysis	287
	<i>J. Hoeltje, B. Kastler and R. Bruening</i>	
14.3.1	Introduction	287
14.3.2	Indications and Contraindications	288
14.3.3	Material	288
14.3.4	Technique	288
14.3.5	Results	292
14.3.6	Complications	292
	References	293
14.4	Trigeminal Ablation	294
	<i>R. Bale and G. Widmann</i>	
14.4.1	Introduction	294
14.4.2	Indications	294
14.4.3	Material	294
14.4.4	Technique	294
14.4.5	Results	296
14.4.6	Complications	297
	References	298

14.5	Epidural Injection Therapy	299
	<i>B. Turowski</i>	
14.5.1	Introduction	299
14.5.2	Indications	299
14.5.3	Preprocedural Imaging	300
14.5.4	Material	301
14.5.5	Technique	301
14.5.6	Results	302
14.5.7	Complications	302
	References	303
14.6	CT-Guided Periradicular Therapy (PRT)	303
	<i>G. Wieners</i>	
14.6.1	Indications	303
14.6.2	Technique	304
14.6.3	Results	306
14.6.4	Complications	306
	References	307
14.7	Discography	307
	<i>O. Beuing</i>	
14.7.1	Indications	307
14.7.2	Material	308
14.7.3	Technique	308
14.7.4	Results	309
14.7.5	Complications	309
