Contributors	vii
Introduction	xi
Part I Telomere Shortening and Ageing	
1. Cellular versus Organismal Aging	3
Andrew Dillin and Jan Karlseder	
2. Telomere-Induced Senescence of Primary Cells	23
Richard Allsopp	
3. Telomeres, Senescence, Oxidative Stress, and Heterogeneity	43
João F. Passos, Glyn Nelson, and Thomas von Zglinicki	
4. Initiation of Genomic Instability, Cellular Senescence, and Organismal Aging by Dysfunctional Telomeres	57
<i>Sandy Chang</i>	
5. Telomerase Mutations and Premature Ageing in Humans	77
Hong-Yan Du, Monica Bessler, and Philip J. Mason	
Part II Telomerase, Telomeres, and Stem Cell Aging	
6. Mechanisms of Stem Cell Ageing	111
Amanda Waterstrat, Erin Oakley, Alison Miller, Carol Swiderski, Ying Liang, and Gary Van Zant	
7. Senescence Signatures of Human Hematopoietic Stem Cells	141
Stefan Zimmermann and Uwe M Martens	

8. Telomere Shortening Induces Cell Intrinsic Checkpoints and Environmental Alterations Limiting Adult Stem Cell Function	161
Luis Guachalla Gutierrez and Zhenyu Ju	
9. p16^{INK4a} and Stem Cell Ageing: A Telomere-Independent Process?	181
Norman E. Sharpless	
10. Telomerase as a Potential Regulator of Tissue Progenitor Cells.	203
Steven E. Artandi	
Part III Telomeres, DNA Damage and Cancer	
11. Telomere Shortening and Telomerase Activation during Cancer Formation.	213
K. Lenhard Rudolph	
12. Telomere Binding Proteins and Disease	229
Maria A. Blasco	
Part IV Therapeutic Targets	
13. Targeting Telomerase: Therapeutic Options for Cancer Treatment	247
W. Nicol Keith and Alan E. Bilsland	
14. Werner Syndrome, Telomeres, and Stress Signaling: Implications for Future Therapies?	285
Terence Davis and David Kipling	
Index	309
