# Contents

<b>1</b>	<b>Mathematical Notation</b> .....	1
<b>2</b>	<b>Rigid Body Kinematics</b> .....	9
2.1	Generalized Coordinates of Angular Orientation .....	9
2.1.1	Euler Angles .....	9
2.1.2	Bryan Angles .....	12
2.1.3	Rotation Tensor .....	14
2.1.4	Euler–Rodrigues Parameters .....	18
2.1.5	Euler–Rodrigues Parameters in Terms of Euler Angles	19
2.1.6	Quaternions .....	20
2.2	Kinematics of Continuous Motion .....	23
2.2.1	Angular Velocity. Angular Acceleration .....	23
2.2.2	Inverse Motion .....	26
2.2.3	Instantaneous Screw Axis. Raccording Axodes .....	27
2.3	Kinematic Differential Equations .....	32
2.3.1	Direction Cosines .....	32
2.3.2	Euler Angles .....	33
2.3.3	Bryan Angles .....	33
2.3.4	Euler–Rodrigues Parameters .....	34
<b>3</b>	<b>Basic Principles of Rigid Body Dynamics</b> .....	37
3.1	Kinetic Energy .....	37
3.2	Angular Momentum .....	39
3.3	Properties of Moments and of Products of Inertia .....	40
3.3.1	Change of Reference Point. Reference Base Unchanged	40
3.3.2	Change of Reference Base. Reference Point Unchanged	41
3.3.3	Principal Axes. Principal Moments of Inertia .....	42
3.3.4	Invariants. Inequalities .....	43
3.4	Angular Momentum Theorem .....	44
3.5	Principle of Virtual Power .....	47

<b>4</b>	<b>Classical Problems of Rigid Body Mechanics</b> .....	49
4.1	Unsymmetric Torque-Free Rigid Body .....	49
4.1.1	Polhodes. Permanent Rotations .....	50
4.1.2	Poinsot's Geometric Interpretation of the Motion .....	52
4.1.3	Solution of Euler's Equations of Motion .....	53
4.1.4	Solution of the Kinematic Differential Equations .....	55
4.2	Symmetric Torque-Free Rigid Body .....	58
4.3	Self-Excited Symmetric Rigid Body .....	60
4.4	Symmetric Heavy Top .....	62
4.5	Symmetric Heavy Body in a Cardan Suspension .....	70
4.6	Gyrost. General Considerations .....	72
4.7	Torque-Free Gyrost. ....	77
4.7.1	Polhodes. Permanent Rotations .....	78
4.7.2	Solution of the Dynamic Equations of Motion .....	80
<b>5</b>	<b>General Multibody Systems</b> .....	89
5.1	Definition of Goals .....	89
5.2	Elements of Multibody Systems .....	91
5.3	Interconnection Structure of Multibody Systems .....	94
5.3.1	Directed System Graph. Associated Matrices .....	95
5.3.2	Directed Graphs with Tree Structure .....	101
5.3.3	Regular Tree Graphs .....	102
5.4	Principle of Virtual Power for Multibody Systems .....	105
5.4.1	Systems Without Constraints to Inertial Space .....	105
5.4.2	Generalized Coordinates .....	107
5.5	Systems with Tree Structure .....	109
5.5.1	Kinematics of Individual Joints .....	109
5.5.2	Kinematics of Entire Systems .....	113
5.5.3	Equations of Motion .....	116
5.5.4	Augmented Bodies .....	118
5.5.5	Force Elements .....	121
5.5.6	Constraint Forces and Torques in Joints .....	124
5.5.7	Software Tools .....	126
5.6	Systems with Closed Kinematic Chains .....	129
5.6.1	Removal of Joints. Holonomic Constraints .....	129
5.6.2	Duplication of Bodies .....	131
5.6.3	Controlled Joint Variables .....	132
5.6.4	Nonholonomic Constraints .....	135
5.6.5	Constraint Forces and Torques in Joints .....	135
5.6.6	Illustrative Examples .....	136
5.6.6.1	Planar Fourbar .....	136
5.6.6.2	Orthogonal Bricard Mechanism .....	137
5.6.6.3	Stewart Platform .....	142
5.6.6.4	Table on Wheels .....	147
5.7	Systems with Spherical Joints .....	150

5.7.1	Systems Coupled to a Carrier Body . . . . .	152
5.7.2	Systems Without Coupling to a Carrier Body . . . . .	158
5.7.3	Permanent Rotations of a Two-Body System . . . . .	163
5.7.4	Multibody Satellite in a Circular Orbit . . . . .	165
5.8	Plane Motion . . . . .	175
5.8.1	Systems Coupled to a Carrier Body . . . . .	176
5.8.2	Systems Without Coupling to a Carrier Body . . . . .	179
5.8.3	Cantilever Beam with Large Deformations . . . . .	181
5.8.4	Stabilized Upright Multibody Pendulum . . . . .	182
5.9	Linear Vibrations of Chains of Bodies . . . . .	184
5.9.1	Spring Graph. Damper Graph. Coordinate Graph . . . .	185
5.9.2	Chains Without Coupling to Inertial Space . . . . .	188
<b>6</b>	<b>Impact Problems in Multibody Systems . . . . .</b>	<b>193</b>
6.1	Basic Assumptions . . . . .	194
6.2	Velocity Increments. Impulses . . . . .	197
6.3	Analogy to the Law of Maxwell and Betti . . . . .	199
6.4	Constraint Impulses and Impulse Couples in Joints . . . . .	203
6.5	Chain Colliding with a Point Mass . . . . .	203
	<b>Solutions to Problems . . . . .</b>	<b>209</b>
	<b>References . . . . .</b>	<b>215</b>
	<b>Index . . . . .</b>	<b>221</b>
