Preface	V
<i>Hartmut Stadtler, Christoph Kilger</i>	
Introduction	1
<i>Hartmut Stadtler</i>	
References	5
<hr/>	
Part I. Basics of Supply Chain Management	
<hr/>	
1 Supply Chain Management – An Overview	9
<i>Hartmut Stadtler</i>	
1.1 Definitions	9
1.2 Building Blocks	11
1.3 Origins	24
References	33
2 Supply Chain Analysis	37
<i>Christopher Sürie, Michael Wagner</i>	
2.1 Motivation and Goals	37
2.2 Process Modeling	39
2.3 Performance Measurement	48
2.4 Inventory Analysis	56
References	62
3 Types of Supply Chains	65
<i>Herbert Meyr, Hartmut Stadtler</i>	
3.1 Motivation and Basics	65
3.2 Functional Attributes	66
3.3 Structural Attributes	69
3.4 Example for the Consumer Goods Industry	71
3.5 Example for Computer Assembly	75
References	80
4 Advanced Planning	81
<i>Bernhard Fleischmann, Herbert Meyr, Michael Wagner</i>	
4.1 What Is Planning?	81
4.2 Planning Tasks Along the Supply Chain	86
4.3 Examples of Type-Specific Planning Tasks and Planning Concepts	92
References	106

Part II. Concepts of Advanced Planning Systems

5 Structure of Advanced Planning Systems	109
<i>Herbert Meyr, Michael Wagner, Jens Rohde</i>	
References	115
6 Strategic Network Design	117
<i>Marc Goetschalcks, Bernhard Fleischmann</i>	
6.1 The Planning Environment	117
6.2 Strategic Network Design Models	120
6.3 Implementation	126
6.4 Review of Models in the Literature	127
6.5 Strategic Network Design Modules in APS Systems	129
6.6 Conclusions	130
References	131
7 Demand Planning	133
<i>Christoph Kilger, Michael Wagner</i>	
7.1 A Demand Planning Framework	133
7.2 Demand Planning Structures	135
7.3 Demand Planning Process	141
7.4 Statistical Forecasting Techniques	144
7.5 Demand Planning Controlling	149
7.6 Additional Features	154
References	159
8 Master Planning	161
<i>Jens Rohde, Michael Wagner</i>	
8.1 The Decision Situation	162
8.2 Model Building	168
8.3 Generating a Plan	176
References	179
9 Demand Fulfilment and ATP	181
<i>Christoph Kilger, Herbert Meyr</i>	
9.1 Available-to-Promise (ATP)	182
9.2 Structuring of ATP by Product	184
9.3 Structuring of ATP by Time	188
9.4 Structuring of ATP by Customer	188
9.5 Order Promising	194
References	198

10 Production Planning and Scheduling	199
<i>Hartmut Stadler</i>	
10.1 Description of the Decision Situation	199
10.2 How to Proceed from a Model to a Production Schedule	200
10.3 Model Building	203
10.4 Updating Production Schedules	209
10.5 Number of Planning Levels and Limitations	211
References	215
11 Purchasing and Material Requirements Planning	217
<i>Hartmut Stadler</i>	
11.1 Basics of Material Requirements Planning	217
11.2 Generation and Timing of Uncritical Orders	219
11.3 Quantity Discounts and Supplier Selection	224
References	228
12 Distribution and Transport Planning	231
<i>Bernhard Fleischmann</i>	
12.1 Planning Situations	231
12.2 Models	237
References	245
13 Coordination and Integration	247
<i>Boris Reuter, Jens Rohde</i>	
13.1 Coordination of APS Modules	248
13.2 Integration of APS	251
13.3 Supply Chain Event Management	260
References	261
14 Collaborative Planning	263
<i>Christoph Kilger, Boris Reuter, Hartmut Stadler</i>	
14.1 Introduction	264
14.2 Types of Collaborations	267
14.3 A Generic Collaboration and Collaborative Planning Process ...	275
14.4 Software Support	281
References	282

Part III. Implementing Advanced Planning Systems

15 The Definition of a Supply Chain Project	287
<i>Christoph Kilger</i>	
15.1 Supply Chain Evaluation	289
15.2 Supply Chain Potential Analysis	297
15.3 Project Roadmap	303
References	306

16 The Selection Process	309
<i>Christoph Külger, Ulrich Wetterauer</i>	
16.1 Creation of a Short List	310
16.2 APS Requirements	316
16.3 Implementation and Integration	318
16.4 Post-implementation Effort and Support Model	321
References	323
17 The Implementation Process	325
<i>Ulrich Wetterauer, Herbert Meyr</i>	
17.1 The APS Implementation Project	325
17.2 Modelling Phases of an APS-Project	341
References	346
<hr/>	
Part IV. Actual APS and Case Studies	
<hr/>	
18 Architecture of Selected APS	349
<i>Herbert Meyr, Heidrun Rosič, Christian Seipl, Michael Wagner, Ulrich Wetterauer</i>	
18.1 AspenTech – aspenONE	349
18.2 i2 Technologies – i2 Six.Two	353
18.3 Oracle – JDEdwards EnterpriseOne Supply Chain Planning	358
18.4 SAP – SCM	362
References	366
19 Strategic Network Design in the Chemical Industry	367
<i>Jochen Häberle, Christoph Külger</i>	
19.1 Case Description	367
19.2 Objectives of the Project	369
19.3 Framework for Strategic Network Design	370
19.4 Setting Up the Baseline Model	374
19.5 Alternative Scenarios	378
19.6 Results and Lessons Learned	380
20 Computer Assembly	381
<i>Christoph Külger</i>	
20.1 Description of the Computer Assembly Case	381
20.2 Scope and Objectives	385
20.3 Planning Processes in Detail	387
20.4 Results and Lessons Learned	397
References	398

21 Oil Industry	399
<i>Mario Roitsch, Herbert Meyr</i>	
21.1 Supply Chain Description and Typology	399
21.2 Requirements for Planning	401
21.3 Description of the (Ideal) Planning System	402
21.4 Modeling and Implementation of APS	406
21.5 Modules in Detail	408
21.6 Results and Lessons Learned	414
22 SCM in a Pharmaceutical Company	415
<i>Tanguy Caillet</i>	
22.1 Case Description	415
22.2 Objectives of Project	418
22.3 Planning Processes	421
22.4 Results and Lessons Learned	429
23 Demand Planning of Styrene Plastics	431
<i>Boris Reuter</i>	
23.1 Description of the Supply Chain	431
23.2 The Architecture of the Planning System	432
23.3 Model Building with SAP APO Demand Planning	434
23.4 The Demand Planning Process of the Styrene Plastics Division ..	439
23.5 Results and Lessons Learned	443
References	444
24 Food and Beverages	445
<i>Michael Wagner, Herbert Meyr</i>	
24.1 Case Description	445
24.2 Aim of the Project	451
24.3 Model Building in Oracle's Strategic Network Optimization	451
24.4 Implementing the Master Planning Model	455
24.5 Results and Lessons Learned	461
References	462
25 Scheduling of Synthetic Granulate	463
<i>Marco Richter, Volker Stockrahm</i>	
25.1 Case Description	463
25.2 Objectives	465
25.3 Modelling the Production Process in APO PP/DS	465
25.4 Planning Process	476
25.5 Results and Lessons Learned	477

26 Event-Based Planning for Standard Polymer Products ...	481
<i>Matthias Lautenschläger</i>	
26.1 Current Situation and Definition of Problem	481
26.2 Solution Concept	483
26.3 Results and Lessons Learned	494

Part V. Conclusions and Outlook

27 Conclusions and Outlook	497
<i>Hartmut Stadler, Christoph Kilger</i>	
27.1 Summary of Advanced Planning	497
27.2 Further Developments of APS	498
27.3 Management of Change Aspects	500
27.4 Scope of Supply Chain Management	501
References	502

Part VI. Supplement

28 Forecast Methods	505
<i>Herbert Meyr</i>	
28.1 Forecasting for Seasonality and Trend	505
28.2 Initialization of Trend and Seasonal Coefficients	511
References	515
29 Linear and Mixed Integer Programming	517
<i>Hartmut Stadler</i>	
29.1 Linear Programming	517
29.2 Pure Integer and Mixed Integer Programming	521
29.3 Remarks and Recommendations	525
References	527
30 Genetic Algorithms	529
<i>Robert Klein</i>	
30.1 General Idea	529
30.2 Populations and Individuals	530
30.3 Evaluation and Selection of Individuals	532
30.4 Recombination and Mutation	534
30.5 Conclusions	535
References	536
31 Constraint Programming	537
<i>Robert Klein</i>	
31.1 Overview and General Idea	537
31.2 Constraint Satisfaction Problems	538

31.3 Constraint Propagation	539
31.4 Search Algorithms	541
31.5 Concluding Remarks	542
References	543
Index	545
About Contributors	553
