# Contents

**1 Introduction and Motivation** . . . . . 1
References . . . . . 4

**2 Quark Flavor Interaction** . . . . . 5
2.1 Chiral Symmetry . . . . . 5
2.2 Dynamical Breaking of Chiral Symmetry . . . . . 6
2.3 The Nambu–Jona–Lasinio Model . . . . . 8
2.4 Gradient Expansion . . . . . 15
2.5 PCAC . . . . . 19
2.6 Relation to Instanton Effects . . . . . 21
2.7 Final Note on Chiral Quark Models . . . . . 24
References . . . . . 24

**3 Self-consistent Soliton** . . . . . 27
3.1 Static Energy Functional . . . . . 27
3.2 Method . . . . . 31
3.3 Soliton Solutions in NJL-Type Models . . . . . 35
3.3.1 Pseudoscalar Fields . . . . . 35
3.3.2 Vector and Axial-Vector Fields . . . . . 38
3.3.3 Remark on the $\omega$ Field . . . . . 39
3.3.4 Comments on Scalar Fields . . . . . 40
References . . . . . 41

**4 The Skyrme Model** . . . . . 43
4.1 Large-$N_{\mathrm{C}}$ Considerations . . . . . 43
4.2 Baryons in Large-$N_{\mathrm{C}}$ QCD . . . . . 47
4.3 A Simple Soliton . . . . . 51
4.4 Skyrme Model Soliton . . . . . 53
4.5 Equations of Motion and Wess–Zumino Term . . . . . 55
4.6 Topological Structures . . . . . 58

4.7 Vector Interactions . . . . . 60
References . . . . . 64

**5 Soliton Quantization in Flavor SU(2)** . . . . . 65
5.1 Collective Coordinates . . . . . 65
5.2 Quantization of the $SU(N)$ Rigid Top . . . . . 67
5.3 Nucleon and $\Delta$ States . . . . . 71
5.4 Nucleon Static Properties . . . . . 73
5.5 Quantization in Vector Meson Models . . . . . 79
5.6 Quantization in Chiral Quark Models . . . . . 81
References . . . . . 83

**6 Soliton Quantization in Flavor SU(3)** . . . . . 85
6.1 Baryon States in the Non-relativistic Quark Model . . . . . 85
6.2 Quantization of the Soliton in the Flavor Symmetric Case . . . . 86
6.3 Flavor Symmetry Breaking . . . . . 92
6.4 Diagonalization with Flavor Symmetry Breaking . . . . . 96
6.5 Beyond the Classical Hedgehog Solution . . . . . 98
6.6 Bound State Approach . . . . . 100
6.7 Baryons with a Heavy Valence Quark . . . . . 105
6.8 Brief Summary on Soliton Quantization . . . . . 110
References . . . . . 111

**7 Baryon Properties** . . . . . 113
7.1 Electromagnetic Properties . . . . . 114
7.2 Relativistic Corrections . . . . . 119
7.3 Axial Charges and Hyperon Decays . . . . . 120
7.4 Proton Spin Puzzle . . . . . 125
7.5 Strangeness in the Nucleon . . . . . 129
7.6 Neutron–Proton Mass Difference . . . . . 131
7.7 Nucleon Structure Functions . . . . . 134
References . . . . . 143

**8 Meson–Baryon Scattering in Chiral Soliton Models** . . . . . 147
8.1 Adiabatic Approximation . . . . . 148
8.2 S-Wave Scattering . . . . . 153
8.3 P-Wave Scattering and the Yukawa Problem . . . . . 156
8.4 Photoproduction . . . . . 160
8.5 Non-harmonic Excitations . . . . . 167
8.6 Estimate of Quantum Corrections in Soliton Models . . . . . 171
References . . . . . 178

**9 Exotic Baryons** . . . 181
9.1 Exotic Flavor Structure and Spectrum . . . 182
9.2 Spectrum and Mixing Mechanisms . . . 185
9.3 The Myth of the Narrow Pentaquark . . . 190
9.4 Rigid Rotator at Arbitrary $N_C$ . . . 193
9.5 Solution to the Yukawa Problem . . . 197
9.6 Skyrme Model Results for the Pentaquark Width . . . 203
References . . . 204

**10 Multi-baryon Systems in the Skyrme Model** . . . 207
10.1 Static Configurations with $B \geq 2$ . . . 207
10.2 Product Ansatz . . . 211
10.3 Nucleon–Nucleon Potential . . . 212
10.4 Towards Dense Matter . . . 217
10.5 An Application to Heavy Ion Collisions . . . 220
10.6 The H-dibaryon . . . 225
References . . . 229

**Epilogue** . . . 231

**A: Chiral Properties of Quark Bilinears** . . . 233
Reference . . . 235

**B: Functional Techniques** . . . 237

**C: Baryon Current and Wess–Zumino Term** . . . 243
C.1 Gradient Expansion of the Fermion Determinant with a Baryon Source . . . 243
C.2 Gauging the Wess–Zumino Term . . . 246
C.3 Wess–Zumino Term in the Bound State Approach . . . 249
C.4 $\pi^0$ Decay . . . 250
References . . . 252

**D: $SU(3)$ Euler Angles** . . . 253
References . . . 258

**E: Matrix Elements of Momentum Eigenstates** . . . 259
E.1 Momentum Eigenstates from Collective Coordinates . . . 259
E.2 Relativistic Recoil Corrections . . . 261
References . . . 263

**Recoupling Coefficients in Adiabatic Scattering** . . . 265
F.1 Adiabatic Recoupling Coefficients . . . 265
F.2 Jost Function for Intrinsic Fluctuations . . . 267
References . . . 270

**Index** . . . 271
