# Contents

## Part I

### Biological Occurrence and Biosynthesis

#### Naturally Occurring Anthracyclines

H. Laatsch · S. Fotso . . . . . 3

#### Biosynthetic Anthracycline Variants

J. Niemi · M. Metsä-Ketelä · G. Schneider · P. Mäntsälä . . . . . 75

#### Anthracycline Biosynthesis: Genes, Enzymes and Mechanisms

M. Metsä-Ketelä · J. Niemi · P. Mäntsälä · G. Schneider . . . . . 101

## Part II

### Synthesis and Chemistry

#### Synthesis of Enantiomerically Pure Anthracyclinones

O. Achmatowicz · B. Szechner . . . . . 143

#### Combinatorial Synthesis of Linearly Condensed Polycyclic Compounds, Including Anthracyclinones, Through Tandem Diels–Alder Additions

P. Vogel . . . . . 187

#### Fluorinated Anthracyclines

G. Giannini · D. Alloatti . . . . . 215

#### Synthesis of the Sugar Moieties

G. Gryniewicz · W. Szeja . . . . . 249

#### Nonnatural Glycosyl Anthraquinones as DNA Binding and Photocleaving Agents

K. Toshima . . . . . 285

---

**Syntheses of Anthracyclines and Fredericamycin A  
via Strong Base-Induced Cycloaddition Reaction  
of Homophthalic Anhydrides**

Y. Kita · H. Fujioka . . . . . 299

**Subject Index** . . . . . 321
