

# Contents

## Invited Papers

|  |    |
|--|----|
| Intelligent Vehicle Systems: Applications and New Trends<br><i>Oleg Gusikhin, Dimitar Filev and Nestor Rychtyckyj</i> .....  | 3  |
| Symbiosis of Human and Communication Robots<br><i>Norihiro Hagita, Hiroshi Ishiguro, Takahiro Miyashita, Takayuki Kanda, Masahiro Shiomi and Kazuhiro Kuwabara</i> ..... | 15 |
| Wave-based Control of Flexible Mechanical Systems<br><i>William J. O'Connor</i> .....  | 25 |
| What is Networked Robotics?<br><i>Gerard McKee</i> .....   | 35 |

## Part I: Intelligent Control Systems and Optimization

|  |     |
|--|-----|
| Encoding Fuzzy Diagnosis Rules as Optimisation Problems<br><i>Antonio Sala, Alicia Esparza, Carlos Ariño and Jose V. Roig</i> .....  | 49  |
| A Multi-agent Home Automation System for Power Management<br><i>Shadi Abras, Stéphane Ploix, Sylvie Pesty and Mireille Jacomino</i> .....  | 59  |
| Feature Selection for Identification of Spot Welding Processes<br><i>Eija Haapalainen, Perttu Laurinen, Heli Junno, Lauri Tuovinen and Juha Röning</i> .....   | 69  |
| Fuzzy Logic Based UAV Allocation and Coordination<br><i>James F. Smith III and ThanhVu H. Nguyen</i> .....   | 81  |
| Neural Network Model Based on Fuzzy ARTMAP for Forecasting of Highway Traffic Data<br><i>D. Boto-Giralda, M. Antón-Rodríguez, F. J. Díaz-Pernas and J. F. Díez-Higuera</i> .....                           | 95  |
| Automated Generation of Optimal Controllers through Model Checking Techniques<br><i>Giuseppe Della Penna, Daniele Magazzeni, Alberto Tofani, Benedetto Intrigila, Igor Melatti and Enrico Tronci</i> ..... | 107 |

**Part II: Robotics and Automation**

|  |     |
|--|-----|
| Autonomous Gait Pattern for a Dynamic Biped Walking<br><i>Christophe Sabourin, Kurosh Madani and Olivier Bruneau.....</i>  | 123 |
| Particle-filter Approach for Cooperative Localization<br>in Unstructured Scenarios<br><i>Fernando Gomez Bravo, Alberto Vale and Maria Isabel Ribeiro .....</i>   | 141 |
| Interaction Control Experiments for a Robot with one Flexible Link<br><i>L. F. Baptista, N. F. S. Bóia, J. M. M. Martins and J. M. G. Sá da Costa.....</i>   | 155 |
| Smooth Trajectory Planning for Fully Automated Passengers Vehicles:<br>Spline and Clothoid Based Methods and its Simulation<br><i>Larissa Labakhua, Urbano Nunes, Rui Rodrigues and Fátima S. Leite.....</i>   | 169 |
| Finding the Best Classifier for Evaluating Cork Quality<br>in an Industrial Environment<br><i>Beatriz Paniagua-Paniagua, Miguel A. Vega-Rodríguez,<br/>Juan A. Gómez-Pulido and Juan M. Sánchez-Pérez.....</i> | 183 |
| Visual Topological Map Building in Self-similar Environments<br><i>Toon Goedemé, Tinne Tuytelaars and Luc Van Gool.....</i>  | 195 |
| Image Motion Estimator to Track Trajectories Specified With Respect<br>to Moving Objects<br><i>J. Pomares, G. J. Garcia, L. Payá and F. Torres .....</i>   | 207 |
| Depth Gradient Image Based on Silhouette: A Solution for Reconstruction<br>of Scenes in 3D Environments<br><i>Pilar Merchán, Antonio Adán and Santiago Salamanca.....</i>                                      | 219 |
| Tracking Multiple Objects using the Viterbi Algorithm<br><i>Andreas Kräußling .....</i>  | 233 |
| Reactive Simulation for Real-Time Obstacle Avoidance<br><i>Mariolino De Cecco, Enrico Marcuzzi, Luca Baglivo and Mirco Zaccariotto .....</i>   | 249 |
| A Gain-Scheduling Approach for Airship Path-Tracking<br><i>Alexandra Moutinho and José Raul Azinheira .....</i>  | 263 |
| Semiotics and Human-Robot Interaction<br><i>João Silva Sequeira and Maria Isabel Ribeiro .....</i>   | 277 |

**Part III: Signal Processing, Systems Modeling and Control**

|  |            |
|--|------------|
| Multimodelling Steps for Free-Surface Hydraulic System Control<br><i>Eric Duviella, Philippe Charbonnaud and Pascale Chiron .....</i>  | 295        |
| Model-based Reconstruction of Distributed Phenomena using Discretized Representations of Partial Differential Equations<br><i>Felix Sawo, Kathrin Roberts and Uwe D. Hanebeck.....</i> | 307        |
| GA-based Approach to Pitch Recognition of Musical Consonance<br><i>Masanori Natsui, Shunichi Kubo and Yoshiaki Tadokoro.....</i>   | 327        |
| Controlling the Lorenz System with Delay<br><i>Yechiel J. Crispin.....</i>   | 339        |
| Hardware-in-the-Loop Simulations for FPGA-based Digital Control Design<br><i>Carlos Paiz, Christopher Pohl and Mario Porrmann .....</i>  | 355        |
| <b>Author Index.....</b>   | <b>373</b> |
