

Contents

1	Fundamental Constants, Elements, Units	1
1.1	Fundamental Physical Constants	1
1.2	Elements and Isotopes	2
1.3	Physical Units and Conversion Factors	2
1.3.1	Systems of Physical Units	2
1.3.2	Conversion Factors for Units	6
1.3.3	Conversion Factors in Formulas of General Physics with Atomic Particles	9
2	Elements of Atomic and Molecular Physics	11
2.1	Properties of Atoms and Ions	11
2.1.1	Properties of the Hydrogen Atom and Hydrogen-Like Ions .	11
2.1.2	Properties of the Helium Atom and Helium-Like Ions	15
2.1.3	Quantum Numbers of a Light Atom	17
2.1.4	Shell Atom Scheme	18
2.1.5	Schemes of Coupling of Electron Momenta in Atoms	24
2.1.6	Parameters of Atoms and Ions in the Form of Periodic Tables	29
2.2	Atomic Radiative Transitions	33
2.2.1	General Formulas and Conversion Factors for Atomic Radiative Transitions	33
2.2.2	Radiative Transitions between Atom Discrete States	38
2.2.3	Absorption Parameters and Broadening of Spectral Lines ...	39
2.3	Interaction Potential of Atomic Particles at Large Separations	43
2.4	Properties of Diatomic Molecules	47
2.4.1	Bound States of Diatomic Molecule	47
2.4.2	Correlation between Atomic and Molecular States	53
2.4.3	Excimer Molecules	66
3	Elementary Processes Involving Atomic Particles	71
3.1	Parameters of Elementary Processes in Gases and Plasmas	71
3.2	Inelastic Collisions of Electrons with Atoms	76
3.3	Collision Processes Involving Ions	78
3.4	Atom Ionization by Electron Impact	85
3.5	Atom Ionization in Gas Discharge Plasma	87

- 3.6 Ionization Processes Involving Excited Atoms 91
- 3.7 Electron–Ion Recombination in Plasma 93
- 3.8 Attachment of Electrons to Molecules 95
- 3.9 Processes in Air Plasma 96

- 4 Transport Phenomena in Gases 99**
 - 4.1 Transport Coefficients of Gases 99
 - 4.2 Ion Drift in Gas in External Electric Field 103
 - 4.3 Conversion Parameters for Transport Coefficients 111
 - 4.4 Electron Drift in Gas in Electric Field 111
 - 4.5 Diffusion of Excited Atoms in Gases 113

- 5 Properties of Macroscopic Atomic Systems 115**
 - 5.1 Equation of State for Gases and Vapors 115
 - 5.2 Basic Properties of Ionized Gas 117
 - 5.3 Parameters and Rates of Processes Involving Nanoparticles 120
 - 5.4 Parameters of Condensed Atomic Systems 126

- A Atomic Spectra 135**

- References 163**

- Index 171**
