Chapter 1		
Introduction to Telepathology	1	
Sajeesh Kumar		
1.1 Introduction to Telemedicine	1	
1.2 What Is Telepathology?	1	
1.3 Scope of Telepathology	2	
1.4 Relevance of Telepathology in Developing Countries	3	
1.5 Summary	4	
Chapter 2		
Digital Slide and Virtual Microscopy-Based Routine and Telepathology Evaluation of Gastrointestinal Biopsy Specimen	5	
Bela Molnar, Lajos Bercezi, Levente Ficsor, Viktor Varga, Attila Tagscherer, and Zsolt Tulassay		
2.1 Introduction	5	
2.2 Materials and Methods	6	
2.2.1 Gastric Routine Biopsy Specimen Analysis	6	
2.2.2 Data Analysis	8	
2.2.3 Slide Digitization and the VM System	9	
2.2.3.1 Used Hardware Tools	9	
2.2.3.2 Features of the Digital Slide Scanning Program	10	
2.2.3.3 Features of the VM Program	10	
2.3 Results	13	

2.3.1	Concordance	13
2.3.2	Reasons for Diagnostic Discordance.....	13
2.3.3	Technical and Practical Data at the Application of VM	14
2.4	Discussion	15
2.5	Summary	16
	References	17

Chapter 3

**Telepathology as an Essential Networking Tool
in VISN 12 of the United States Veterans****Health Administration..... 19**Bruce E. Dunn, Hongyung Choi, Daniel L. Recla,
and Thomas R. Wisniewski

3.1	Background	19
3.2	Primary Diagnosis and Clinical Consultation in Surgical Pathology	21
3.3	Diagnosis and Consultation in Clinical Pathology	25
3.4	Future Developments in Telepathology	26
3.5	Summary	28
	Acknowledgment	28
	References	29

Chapter 4

Tele neuropathology 31

Georg Hutarow

4.1	Available Systems	31
4.1.1	Light Microscopes.....	31
4.1.2	Scanner Systems	32
4.1.3	Robotic Microscopes.....	32
4.1.4	Systems Similar to Microscopes.....	32
4.2	Intraoperative Frozen Section Diagnosis	32
4.2.1	General.....	32
4.2.2	Equipment for Frozen Section Diagnosis.....	33
4.2.2.1	Gross Examination	33
4.2.2.2	Microscope.....	33
4.2.2.3	Telepathology Software.....	35

4.2.2.4	Diagnosis	36
4.2.2.5	Laboratory Equipment	36
4.2.3	Sequence of Frozen Sections	39
4.2.4	Statistical Evaluation 2000–2007	41
4.3	Second-Opinion Diagnosis and Specialist Discussion	43
4.3.1	Digital Camera	44
4.3.2	Video Camera	44
4.3.3	Robotic Microscope	44
4.4	Database with Virtual Slides	45
4.5	Data Protection	45
4.6	Discussion of Teleneuropathology	45
4.7	Future Aspects	47
4.8	Summary	48
	Appendix: Situation in Austria	48
	Acknowledgments	49
	References	50
	Chapter 5	
	Applications of Virtual Microscopy	53
	P.H.J. Riegman, W.N.M. Dinjens, M.H.A. Oomen, W.F. Cloetser, R.J.J.R. Scholte, W. Sjoerdsma, A.R.A. Riegman, and J.W. Oosterhuis	
5.1	Introduction	53
5.2	Steady Replacement of Microscopes	53
5.3	Education	54
5.4	Ring Trials	55
5.5	Pilot for Implementation in Routine Pathology	56
5.6	Privacy-Sensitive Network Environment	57
5.7	External Applications	58
5.7.1	Tissue Banking	58
5.7.2	Multicenter Trials	59
5.7.3	Tissue Microarray Analysis	59
5.7.4	Histopathology Forum	59
5.8	Future Developments	60
5.9	Summary	61
	Acknowledgments	62
	References	63

Chapter 6	
Telepathology in Veterinary Diagnostic Cytology	63
Paol a Maiolino a nd Gionat a De Vico	
6.1	Background Information 63
6.2	Human and Veterinary Global Experience 64
6.3	Guidelines for Preparation of Telecytologic Cases. 65
6.4	Limitations and Future Directions 66
6.5	Education and Training Opportunities Available . . . 67
6.6	Summary 68
	References 69
Chapter 7	
Use of Telepathology in Mohs Micrographic Surgery	71
Julie K. K ar en, Kl aus J. Busam, and Kishwer S. N ehal	
7.1	Background 71
7.1.1	Mohs Micrographic Surgery 71
7.1.2	Telepathology. 72
7.2	Telepathology in Dermatology 72
7.3	Telepathology in Mohs Micrographic Surgery. 73
7.3.1	Feasibility 73
7.3.2	Clinical Experience 74
7.3.3	Limitations. 76
7.4	Future Directions 76
7.5	Summary 77
	References 78
Chapter 8	
Combining Dynamic- and Static-Robotic Techniques for Real-Time Telepathology	79
Vincenzo Dell a Mea, Palmin a Cat aldi, Ba rbara P ert oldi, a nd Carl o A. Bel trami	
8.1	Introduction. 79
8.2	Methods 80
8.2.1	The Cases 81
8.2.2	The Telepathology System 81
8.2.3	Statistical Analysis. 82
8.3	Results. 83

8.3.1	The Diagnoses	83
8.3.2	The Time	83
8.3.3	The Static Images.....	84
8.4	Discussion	86
8.5	Summary	87
	Acknowledgment	87
	References	88

Chapter 9

Telepathology in Iran..... 91

Afs hin Abdirad a nd Siava sh Ghader i-Sohi

9.1	Telepathology in Middle East.....	92
9.2	Telepathology in Iran	93
9.2.1	Teleconsultation in Iran	93
9.2.2	Remote Primary Diagnosis in Iran	95
9.2.3	Remote Education in Iran	95
9.2.4	Quality Assurance Programs in Iran.....	97
9.3	Problems.....	97
9.4	What Have Been Done?	98
9.5	Summary	101
	References	101

Chapter 10

Telepathology in Japan..... 105

Taka shi Sawa i

10.1	The Present Conditions of Japanese Diagnostic Pathology and the Background of Development of Telepathology	105
10.2	The History of IT and Telepathology in Japan.....	110
10.3	Recent Governmental Policy and Activity to Telepathology	111
10.4	The Purpose of Japanese Telepathology, Especially Intraoperative Rapid Diagnosis.....	113
10.5	Development of Infrastructure and Telepathology Systems in Japan.....	116
10.6	Telepathology Applications in Medical Field.....	118
10.7	The Telepathology System in Future.....	121
10.7.1	The Government Strategy to Telepathology.....	121
10.7.2	Technological Development of DVDs and the Imaging Compression Technology	123

10.8	Problems Relating the Prevalence of Telepathology in Japan	123
10.9	Summary	124
	References	125
Chapter 11		
	Telepathology in Hungary	127
	M. Cser neky, B. Szende, L. F ónyad, and T. Kren ács	
11.1	Historical Background	127
11.2	First Steps to Introduce Telepathology in Hungary	129
11.3	Further Developments Supported by the European Union.	130
11.4	Structure and Function of Bepro in Hungary	131
11.4.1	General Considerations	131
11.4.2	Structure of the Telepathology Stations	132
11.4.3	Function of the Bepro Project Between November 2001 and June 2002	132
11.4.4	Main Results of the Bepro Project.	135
11.5	The Era of Digital Slides in Hungary	135
11.5.1	The Potential of Digital Slides in Histopathology	135
11.5.2	Pilot Studies for Telepathology Using Digital Slides.	137
11.6	Present and Future of Dynamic Telepathology in Hungary	138
11.6.1	Digital Microscopy for Teaching Histopathology in Hungary	140
11.6.1.1	E-Learning	140
11.6.2	Digital Microscopy for Gradual Teaching	141
11.6.3	Digital Microscopy for Postgradual Teaching, EQA, and E-Learning	142
11.7	Video Conference Services for the Hungarian Higher-Education and Research Community	143
11.8	Conclusion	145
11.9	Summary	145
	References	146

Chapter 12	
Telecytology: A Retrospect and Prospect.....	149
Aruna Prayaga	
12.1	Background Information 149
12.2	Global Experience 152
12.3	Future Perspective 155
12.3.1	Indian Scenario 158
12.4	Education and Training Opportunities Available..... 159
12.5	Summary 160
	Acknowledgments..... 160
	References 161
Chapter 13	
Teledermatopathology: Current Status and Perspectives.....	163
Cesare Massone, Alexandra Maria Giovanna Brunasso, and H. Peter Soyer	
13.1	Introduction..... 163
13.2	SAF Teledermatopathology 164
13.3	Real-Time (Dynamic) Teledermatopathology..... 168
13.4	Virtual Microscope Teledermatopathology 169
13.5	Conclusions 176
13.6	Summary 176
	References 177
Chapter 14	
Ultrastructural Telepathology: Remote EM Diagnostic via Internet.....	179
Josef A. Schroeder	
14.1	Introduction..... 179
14.2	The Digital Era..... 182
14.3	From Remote to Virtual Light Microscopy 182
14.4	Implications for Diagnostic Electron Microscopy..... 183
14.5	The Need for Ultrastructural Telepathology 185
14.6	Remote Electron Microscopy..... 186
14.7	The Ultrastructural Telepathology Setup 186
14.8	Extension of the Server–Client Architecture 189

14.9	Performance of the Ultrastructural Telepathology.	192
14.10	Illustrative Telepathology Diagnostic and Basic Research Examples.	194
14.11	Discussion and Conclusions	196
14.12	Summary	198
	Acknowledgements.	199
	References	199

Chapter 15

Remote Control of the Scanning Electron Microscope 205

Atsushi Yamada

15.1	Scanning Electron Microscope	205
15.1.1	Principle	205
15.1.2	Treatment of Biological Sample	205
15.1.3	Observation	206
15.2	Remote Control of the SEM.	207
15.2.1	Effectiveness of the Remote Control.	207
15.2.2	Conditions Required For Remote Control.	207
15.3	Practical Use of Remote Control Lock System.	208
15.3.1	System Using a Web Browser.	208
15.3.1.1	Construction	209
15.3.1.2	Communication Method	209
15.3.2	Remote Desktop System	213
15.3.2.1	Construction	213
15.3.2.2	Communication Method	214
15.4	Data Transfer and Response.	214
15.4.1	Amount of Data Transfer	215
15.4.1.1	WEB-SEM	215
15.4.1.2	Remote Desktop	215
15.4.2	Technique for Improving a Response	216
15.4.2.1	Reduction of a Communication Amount of Data	217
15.4.2.2	Single-Action Operation.	217
15.4.3	Case of the Operation of Remote Control	218
15.4.3.1	Difference in a Communication Method	218
15.4.3.2	Communication Channel and a Response	220
15.4.3.3	Communication and a Remote Control System	222
15.5	Conclusion	223
15.6	Summary	224

Chapter 16
Telepathology: An Audit..... 225
 Sajees h Kumar

16.1 Telepathology is Advancing 225
 16.2 Will Telepathology Replace Traditional
 Methods? 225
 16.3 Issues Related to Telepathology: A Brief
 Overview 226
 16.4 Changing Industry 226
 16.5 Technical Challenge 227
 16.6 Money Matters..... 227
 16.7 Conclusion 228

Glossary 229

Subject Index..... 237
