

Contents

Part I Basics

1	Knowledge Representation	3
1.1	Basic Concepts	4
1.2	Cognitive Science	7
1.3	Types of Human Knowledge	11
1.4	Knowledge Representation Techniques	14
1.4.1	Object–Attribute–Value Triplets	15
1.4.2	Uncertain Facts	15
1.4.3	Fuzzy Facts	16
1.4.4	Rules	16
1.4.5	Semantic Networks	17
1.4.6	Frames.....	18
1.5	Knowledge Representation Languages.....	19
1.5.1	Logic-Based Representation Languages	20
1.5.2	Frame-Based Representation Languages	27
1.5.3	Rule-Based Representation Languages.....	29
1.5.4	Visual Languages for Knowledge Representation.....	32
1.5.5	Natural Languages and Knowledge Representation	35
1.6	Knowledge Engineering	36
1.7	Open Knowledge Base Connectivity (OKBC)	38
1.8	The Knowledge Level	41
2	Ontologies.....	45
2.1	Basic Concepts	46
2.1.1	Definitions	46
2.1.2	What Do Ontologies Look Like?.....	48
2.1.3	Why Ontologies?	50
2.1.4	Key Application Areas.....	55
2.1.5	Examples.....	57
2.2	Ontological Engineering.....	59
2.2.1	Ontology Development Tools.....	59
2.2.2	Ontology Development Methodologies	66
2.3	Applications.....	72

2.3.1	Magpie	73
2.3.2	Briefing Associate.....	74
2.3.3	Quickstep and Foxtrot.....	75
2.4	Advanced Topics	76
2.4.1	Metadata, Metamodeling, and Ontologies	76
2.4.2	Standard Upper Ontology	77
2.4.3	Ontological Level	80
3	The Semantic Web.....	81
3.1	Rationale.....	82
3.2	Semantic Web Languages	83
3.2.1	XML and XML Schema	85
3.2.2	RDF and RDF Schema	87
3.2.3	DAML+OIL.....	90
3.2.4	OWL	93
3.2.5	SPARQL	95
3.2.6	GRDDL.....	98
3.2.7	RDFa.....	100
3.2.8	SKOS	103
3.3	The Role of Ontologies	105
3.4	Semantic Markup.....	107
3.5	Development Frameworks.....	110
3.6	Reasoning	113
3.7	Semantic Web Services	116
3.8	Open Issues.....	121
3.9	Quotations	124
4	Model Driven Engineering	125
4.1	Models and Metamodels.....	125
4.1.1	Models in General.....	126
4.1.2	Model-Driven Engineering Theory.....	126
4.2	Types of Software Models.....	132
4.3	The Model Driven Architecture	133
4.4	Metamodeling Languages	135
4.4.1	The Meta-Object Facility.....	136
4.4.2	Ecore Metamodeling Language	138
4.5	Standardized MDA Metamodels	140
4.5.1	Unified Modeling Language	140
4.5.2	Common Warehouse Metamodel (CWM).....	141
4.5.3	Ontology Definition Metamodel.....	143
4.6	UML Profiles.....	143
4.6.1	Basics of UML Profiles	143
4.6.2	Examples of UML Profiles	145

4.7	Model Transformations	147
4.7.1	Definitions	147
4.7.2	Classification of Model Transformation Languages....	148
4.7.3	Model Transformation Languages	149
4.7.4	Model Transformation Tools and Implementations....	150
4.8	Object Constraint Language	151
4.9	An XML for Sharing MDA Artifacts	152
4.10	The Need for Modeling Spaces	154
5	Modeling Spaces.....	157
5.1	Modeling the Real World	158
5.2	The Real World, Models, and Metamodels	159
5.3	The Essentials of Modeling Spaces	161
5.4	Modeling Spaces Illuminated	164
5.5	Modeling Spaces Applied.....	167
5.6	A Touch of RDF(S) and MOF Modeling Spaces	169
5.7	A Touch of the Semantic Web and MDA Technical Spaces..	171
5.8	Instead of Conclusions	173

Part II Model Driven Engineering and Ontologies

6	Software Engineering Approaches to Ontology Development.....	177
6.1	A Brief History of Ontology Modeling	177
6.1.1	Networked Knowledge Representation and Exchange Using UML and RDF.....	177
6.1.2	Extending the Unified Modeling Language for Ontology Development.....	182
6.1.3	The Unified Ontology Language	187
6.1.4	UML for the Semantic Web: Transformation-Based Approach.....	188
6.1.5	The AIFB OWL DL Metamodel.....	191
6.1.6	NeOn Metamodels for the Semantic Web	192
6.1.7	The GOOD OLD AI ODM Proposal	193
6.2	Ontology Development Tools Based on Software Engineering Techniques	193
6.2.1	Protégé	194
6.2.2	DUET (DAML UML Enhanced Tool)	197
6.2.3	An Ontology Tool for IBM Rational Rose UML Models.....	198
6.2.4	Visual Ontology Modeler (VOM)	200
6.3	Summary of Relations Between UML and Ontologies	201

- 6.3.1 Summary of Approaches and Tools for Software Engineering-Based Ontology Development 202
- 6.3.2 Summary of Differences Between UML and Ontology Languages 202
- 6.3.3 Future Development 205
- 7 The MDA-Based Ontology Infrastructure 207
 - 7.1 Motivation 207
 - 7.2 Overview 208
 - 7.3 Bridging RDF(S) and MOF 211
 - 7.4 Design Rationale for the Ontology UML Profile 213
- 8 The Ontology Definition Metamodel (ODM)..... 215
 - 8.1 ODM Metamodels 215
 - 8.2 A Few Objections to the ODM Specification..... 217
 - 8.3 The Resource Description Framework Schema (RDFS) Metamodel..... 219
 - 8.4 The Web Ontology Language (OWL) Metamodel..... 225
- 9 The Ontology UML Profile 235
 - 9.1 Classes and Individuals in Ontologies..... 235
 - 9.2 Properties of Ontologies 238
 - 9.3 Statements..... 240
 - 9.4 Different Versions of the Ontology UML Profile 241
- 10 Mappings of MDA-Based Languages and Ontologies 245
 - 10.1 Relations Between Modeling Spaces 245
 - 10.2 Transformations Between Modeling Spaces 248
 - 10.3 Example of an Implementation: An XSLT-Based Approach... 252
 - 10.3.1 Implementation Details..... 253
 - 10.3.2 Transformation Example 254
 - 10.3.3 Practical Experience 257
 - 10.3.4 Discussion 260

Part III Applications

- 11 Modeling Tools and Ontology Development 265
 - 11.1 MagicDraw 266
 - 11.1.1 Starting with MagicDraw..... 266
 - 11.1.2 Things You Should Know when Working with UML Profiles 268

11.1.3	Creating a New Ontology	270
11.1.4	Working with Ontology Classes	273
11.1.5	Working with Ontology Properties	276
11.1.6	Working with Individuals	280
11.1.7	Working with Statements	282
11.2	Poseidon for UML	283
11.2.1	Modeling Ontology Classes in Poseidon	285
11.2.2	Modeling Ontology Individuals and Statements in Poseidon	286
11.3	Sharing Models Between UML Tools and Protégé	287
11.4	Atlas Transformation Language	291
11.4.1	Basics	291
11.4.2	ATL Integrated Development Environment	292
11.4.3	Support for Technical Spaces	293
11.4.4	ATL for Transforming Between ODM and UML	294
12	An MDA Based Ontology Platform: AIR	299
12.1	Motivation	299
12.2	The Basic Idea	300
12.3	Metamodel—the Conceptual Building Block of AIR	302
12.4	The AIR Metadata Repository	303
12.5	The AIR Workbench	306
12.6	The Role of XML Technologies	308
12.7	Possibilities	309
13	Examples of Ontology	311
13.1	Petri Net Ontology	311
13.1.1	Organization of the Petri Net Ontology	313
13.1.2	The Core Petri Net Ontology in the Ontology UML Profile	316
13.1.3	An Extension Example: Upgraded Petri Nets	319
13.2	Educational Ontologies	322
13.2.1	Conceptual Solution	323
13.2.2	Mapping the Conceptual Model to Ontologies	325
14	Beyond the Ontology Definition Metamodel: Applications	335
14.1	Integrated Ontology Development Toolkit	335
14.2	TwoUse: UML and OWL Modeling	338
14.3	Model Driven Engineering of Ontology Reasoners	341
14.4	Model Driven Engineering and Semantic Web Rules	345
	References	351
