

Contents

Introduction	1
The structural evolution of industrial districts and adaptive competitive advantages	3
<i>Giulio Cainelli and Roberto Zoboli</i>	
1. Industrial districts and local systems of production: An overview of the Italian experience and the theoretical debate	3
2. Italian industrial districts and European 'regional clusters'	6
3. The contribution of this book	8
3.1. Three theoretical perspectives	9
3.2. Firm re-organisation and growth	11
3.3. Patterns of formal and informal innovation	14
3.4. Diverging propensities towards internationalisation	16
4. Evolving competitive advantages?	17
4.1. Measurability and models	18
4.2. Sustainability of performances	19
 Part I. Theoretical Perspectives	 31
Regional governance and economic development: A European perspective	33
<i>Gilberto Antonelli</i>	
1. Introduction	33
2. Firms and local systems of production in the Italian economy	35
2.1. The phases of development in the post-war Italian economy	36
2.2. The competitiveness of industrial districts	38
2.3. Questions of interpretations and the new needs of economic policy	39
3. Regional economic development and convergence/divergence	43
4. The allocation of the tools of economic policy and the role of the regions	50

VIII Contents

Italian industrial districts: Facts and theories	55
<i>Fabio Nuti</i>	
1. Introduction	55
2. Why should we study industrial districts at all?	57
2.1. What are Marshallian industrial districts?	57
2.2. A single or many concepts?	58
2.3. History of an idea	58
2.4. Historical and recent districts	60
2.5. The cyclical interpretation	63
2.6. Traditional and technologically advanced districts	65
2.7. The concept of Marshallian industrial districts revisited	66
2.8. The 'wishful residual': industrial atmosphere and innovativeness	66
2.9. Externalities and trickling down	68
2.10. What kind of innovative activity?	69
2.11. Co-ordination	71
2.12. Co-operation and trust	72
2.13. Flexibility and flexible specialisation	74
3. Conclusions	75
 Modelling the structure and evolution of industrial districts	 78
<i>Mario Agostino Maggioni</i>	
1. Introduction	78
2. How do industrial districts come about? Agglomeration economies and firms' clustering	79
2.1. The effect of previous locations on clustering dynamics	79
2.2. Locational benefits and costs and the development of an industrial district	80
2.3. A logistic model	84
2.4. Location process in a two-districts framework	90
2.5. Co-operative interactions	95
3. How do industrial districts work? Emergence and evolution of governance structures	100
3.1. The evolution of industrial districts: a simulation exercise	103
4. Conclusions	110

Part II. Firm Ownership and District Organisation **115**

Institutional innovations in industrial districts **117**

Riccardo Varaldo and Luca Ferrucci

1. Introduction 117
2. Barriers to institutional changes inside the firms 117
3. The industrial district firm between institutional specificities and barriers to changes 118
4. New competitive strategies and institutional innovation 120
5. Towards new institutional paths for districts firms 121
6. Industrial and financial policy in supporting institutional changes in districts firms 125
7. Conclusions 125

Groups of small and medium-sized firms in industrial districts in Italy **128**

Donato Iacobucci

1. Introduction 128
2. The unit of analysis: companies or groups? 130
3. The presence of business groups in the Italian manufacturing industry 133
4. The causes explaining the presence of business groups among SMEs in industrial districts 135
5. The role of groups of SMEs in the evolution of industrial districts 139
 - 5.1. Furniture groups 140
 - 5.2. Footwear groups 142
 - 5.3. Household appliance groups 145
 - 5.4. Groups operating in other districts 146
6. Conclusions 148

Ownership linkages and business groups in industrial districts. **155**

The case of Emilia Romagna

Francesco Brioschi, Maria Sole Brioschi and Giulio Cainelli

1. Introduction 155
2. Industrial districts, ownership linkages and business group structures 156
3. The corporate grouping within the industrial districts of Emilia Romagna: the empirical evidence 158
4. The evolution of the industrial district organisation 167
5. Conclusions 171

The role of medium-sized and large firms in the evolution of industrial districts. The case of Marche	175
<i>Valeriano Balloni and Donato Iacobucci</i>	
1. Introduction	175
2. The role of small and medium-sized firms in industrial districts	176
3. The Marche region and its industrial districts	179
4. The role of large and medium-sized firms in the industrial districts of the Marche region	188
5. Conclusions	193
Entrepreneurship, labour organisation and labour mobility in industrial districts	198
<i>Massimo Omiccioli and Fabio Quintiliani</i>	
1. Introduction	198
2. Ownership and management structure	199
3. Labour organisation and mobility	202
4. Conclusions	204
Appendix	207
Integration and convergence in the internal dynamics of industrial districts. A case study	219
<i>Mario Nosvelli</i>	
1. Introduction	219
2. The area of Parabiago within the textile district of Asse Sempione	220
2.1. On the existence of the footwear district of Parabiago	222
3. The evolution of the district and sub-district	227
3.1. The location quotient and shift-share analysis	227
3.2. The ASPO data bank	229
3.3. Empirical results	230
4. The Asse Sempione district and the Parabiago sub-district: sectors and territory, integration and autonomy	233
5. Conclusions	235
Appendix	239

Part III. Innovation **241**

Can a Marshallian industrial district be innovative? The case of Italy **243** *Giulio Cainelli and Nicola De Liso*

1. Introduction	243
2. Division of labour, codified and tacit knowledge within industrial districts	244
2.1. Theoretical issues	244
2.2. From theory to empirical analysis: some clarifications	246
3. The empirical analysis	247
3.1. The data set	247
3.2. Some performance indicators: a descriptive analysis	248
4. The econometric investigation	249
4.1. The modelling strategy	249
4.2. The results	251
5. Conclusions	253

Are industrial districts more conducive to innovative production? **257** **The case of Emilia Romagna** *Riccardo Leoncini and Francesca Lotti*

1. Introduction	257
2. Innovative activity, organisation and market structure	258
3. Data and methodology	261
4. The empirical results	261
4.1. Innovative activity and R&D expenditures	262
4.2. Potential and actual innovative production	264
5. The role of the public sector	267
6. Conclusions	269

Environmental impact and innovation in industrial districts **272** *Anna Montini and Roberto Zoboli*

1. Introduction	272
2. Environmental policy, industrial innovation, and the advantages of IDs	273
3. Agglomeration dis-economies and the environmental impact of industry	277
4. Measuring air pollution by manufacturing industries in Italy	281
4.1. Estimates of air pollution in the 'Local Labour Systems' of Emilia-Romagna	283
5. Responses to environmental policies in Italian industrial districts	294
5.1. Environmental investments and policy-induced innovations	295
5.2. Main features of innovative responses to environmental policy	304
6. Conclusions: unexploited 'cooperative advantages'?	305
Appendix	312

Part IV. Internationalisation 317

Local engines of global trade: the case of Italian industrial districts 319
Stefano Menghinello

1. Introduction 319
2. Industrial districts as a source of competitive advantage 320
3. Methodological background 322
4. Some empirical evidence 326
 - 4.1. Export performance of local industrial systems 326
 - 4.2. Contribution of industrial districts to Italian exports 328
 - 4.3. Output quality and variety of industrial districts exports 330
5. Conclusions 334

Small multinational groups in the Italian industrial districts: interpretations and empirical evidence from the mechanical engineering industry 336
Sergio Mariotti and Marco Mutinelli

1. Introduction 336
2. The atypical nature of Italy's internationalisation 336
3. Internationalisation of production by the districts 339
4. Empirical findings 341
5. Conclusions 345
