Contents

1. Introduction 1

2. Motives for Private Intergenerational Transfers 5
2.1 Altruistic Transfers 5
2.2 Accidental Bequests 9
2.3 Transfers as Exchange 11
2.4 Transfers for Joy-of-Giving 14
2.5 Empirical Evidence 15

3. Empirical Facts About Transfers in Germany 25
3.1 The Income and Expenditure Survey 1993 26
3.2 The Socio-Economic Panel 41
3.2.1 Transfers *Inter Vivos* 41
3.2.2 Bequests Between 1960 and 1988 46
3.2.3 Particulars about Wealth Holdings 52

4. Private versus Public Transfers During a Demographic Transition 59
4.1 The Demographic Transition 60
4.2 What Demographics Reveal About Public and Private Transfers 69
4.3 The Impact of the Transfer Motive 72
4.4 A Generational Accounting Approach 78
4.4.1 Conventional Generational Accounting 78
4.4.2 The Extension to Private Transfers 87
4.4.3 Caveats and Conclusion 95

5. Intergenerational Transfers in a General Equilibrium Setting 99
5.1 The Model 100
5.2 Private Transfers, Demographic Transition, and Generational Welfare 104
5.2.1 No Private Transfers 104
5.2.2 Joy-of-Giving 107
5.2.3 Accidental Bequests 109
5.2.4 Bequests-as-Exchange 112

5.2.5 Summary ... 115
5.3 Intergenerational Transfer Accounting and General Equilibrium 116
5.3.1 Conventional Generational Accounting ... 117
5.3.2 Extended Generational Accounting ... 121
5.3.3 Summary ... 126
5.4 The Taxation of Private Intergenerational Transfers ... 128
5.4.1 The Impact of Distortionary Social Insurance Contributions ... 129
5.4.2 Joy-of-Giving ... 132
5.4.3 Accidental Bequests ... 136
5.4.4 Bequests-as-Exchange ... 138
5.4.5 Summary ... 141

6. Summary ... 143

A. Appendix ... 147
A.1 The Implications of Altruistic Bequests ... 147
A.2 The Impact of Social Security on Accidental Bequests ... 149
A.3 The Impact of the Number of Children on Inheritances *Per Capita* ... 151
A.4 Sensitivity Analysis of Public and Private Accounts ... 154
A.5 The Unified General Equilibrium Model ... 155
A.6 Bequests-as-Exchange and Lump-Sum Taxation ... 156
A.7 The Derivation of Future Generations' Public Generational Account ... 156
A.8 The Derivation of the Life-Cycle Budget Constraint in Terms of an Average Individual ... 157
A.9 The Calculation of Future Generations' Total Generational Account ... 158
A.10 The Equivalence of $GA^{tot}_{t+1,t+1}$ and $TT_{t+1,t+1}$ under Steady State Conditions ... 159
A.11 The Equivalence of Extended Generational Accounting and the Back-of-the-Envelope Calculation ... 160
A.12 Complete Simulation Results ... 162
