

Contents

1. Fuzzy Sets and Fuzzy Systems	1
1.1 Basics of Fuzzy Sets	1
1.1.1 Fuzzy Sets	1
1.1.2 Fuzzy Operations	7
1.1.3 Fuzzy Relations	10
1.1.4 Measures of Fuzziness	13
1.1.5 Measures of Fuzzy Similarity	15
1.2 Fuzzy Rule Systems	16
1.2.1 Linguistic Variables and Linguistic Hedges	16
1.2.2 Fuzzy Rules for Modeling and Control	19
1.2.3 Mamdani Fuzzy Rule Systems	25
1.2.4 Takagi-Sugeno-Kang Fuzzy Rule Systems	26
1.2.5 Fuzzy Systems are Universal Approximators	27
1.3 Interpretability of Fuzzy Rule System	29
1.3.1 Introduction	29
1.3.2 The Properties of Membership Functions	30
1.3.3 Completeness of Fuzzy Partitions	30
1.3.4 Distinguishability of Fuzzy Partitions	33
1.3.5 Consistency of Fuzzy Rules	34
1.3.6 Completeness and Compactness of Rule Structure	37
1.4 Knowledge Processing with Fuzzy Logic	37
1.4.1 Knowledge Representation and Acquisition with IF-THEN Rules	37
1.4.2 Knowledge Representation with Fuzzy Preference Models	42
1.4.3 Fuzzy Group Decision Making	45
2. Evolutionary Algorithms	49
2.1 Introduction	49
2.2 Generic Evolutionary Algorithms	49
2.2.1 Representation	50
2.2.2 Recombination	53
2.2.3 Mutation	54
2.2.4 Selection	55

2.3	Adaptation and Self-Adaptation in Evolutionary Algorithms .	55
2.3.1	Adaptation	55
2.3.2	Self-adaptation	56
2.4	Constraints Handling	58
2.5	Multi-objective Evolution	60
2.5.1	Weighted Aggregation Approaches	61
2.5.2	Population-based Non-Pareto Approaches	62
2.5.3	Pareto-based Approaches	62
2.5.4	Discussions	63
2.6	Evolution with Uncertain Fitness Functions	64
2.6.1	Noisy Fitness Functions	64
2.6.2	Approximate Fitness Functions	64
2.6.3	Robustness Considerations	68
2.7	Parallel Implementations	69
2.8	Summary	70
3.	Artificial Neural Networks	73
3.1	Introduction	73
3.2	Feedforward Neural Network Models	73
3.2.1	Multilayer Perceptrons	74
3.2.2	Radial Basis Function Networks	75
3.3	Learning Algorithms	75
3.3.1	Supervised Learning	76
3.3.2	Unsupervised Learning	78
3.3.3	Reinforcement Learning	79
3.4	Improvement of Generalization	80
3.4.1	Heuristic Methods	81
3.4.2	Active Data Selection	81
3.4.3	Regularization	82
3.4.4	Network Ensembles	84
3.4.5	<i>A Priori</i> Knowledge	85
3.5	Rule Extraction from Neural Networks	86
3.5.1	Extraction of Symbolic Rules	86
3.5.2	Extraction of Fuzzy Rules	87
3.6	Interaction between Evolution and Learning	89
3.7	Summary	90
4.	Conventional Data-driven Fuzzy Systems Design	93
4.1	Introduction	93
4.2	Fuzzy Inference Based Method	94
4.3	Wang-Mendel's Method	100
4.4	A Direct Method	102
4.5	An Adaptive Fuzzy Optimal Controller	105
4.6	Summary	110

5.	Neural Network Based Fuzzy Systems Design	111
5.1	Neurofuzzy Systems	111
5.2	The Pi-sigma Neurofuzzy Model	114
5.2.1	The Takagi-Sugeno-Kang Fuzzy Model	114
5.2.2	The Hybrid Neural Network Model	115
5.2.3	Training Algorithms	116
5.2.4	Interpretability Issues	120
5.3	Modeling and Control Using the Neurofuzzy System	123
5.3.1	Short-term Precipitation Prediction	123
5.3.2	Dynamic Robot Control	124
5.4	Neurofuzzy Control of Nonlinear Systems	130
5.4.1	Fuzzy Linearization	132
5.4.2	Neurofuzzy Identification of the Subsystems	135
5.4.3	Design of Controller	137
5.4.4	Stability Analysis	138
5.5	Summary	141
6.	Evolutionary Design of Fuzzy Systems	143
6.1	Introduction	143
6.2	Evolutionary Design of Flexible Structured Fuzzy Controller	145
6.2.1	A Flexible Structured Fuzzy Controller	145
6.2.2	Parameter Optimization Using Evolution Strategies	146
6.2.3	Simulation Study	147
6.3	Evolutionary Optimization of Fuzzy Rules	148
6.3.1	Genetic Coding of Fuzzy Systems	148
6.3.2	Fitness Function	152
6.3.3	Evolutionary Fuzzy Modeling of Robot Dynamics	153
6.4	Fuzzy Systems Design for High-Dimensional Systems	160
6.4.1	Curse of Dimensionality	160
6.4.2	Flexible Fuzzy Partitions	161
6.4.3	Hierarchical Structures	163
6.4.4	Input Dimension Reduction	164
6.4.5	GA-Based Input Selection	169
6.5	Summary	171
7.	Knowledge Discovery by Extracting Interpretable Fuzzy Rules	173
7.1	Introduction	173
7.1.1	Data, Information and Knowledge	173
7.1.2	Interpretability and Knowledge Extraction	174
7.2	Evolutionary Interpretable Fuzzy Rule Generation	175
7.2.1	Evolution Strategy for Mixed Parameter Optimization	176
7.2.2	Genetic Representation of Fuzzy Systems	177
7.2.3	Multiobjective Fuzzy Systems Optimization	178
7.2.4	An Example: Fuzzy Vehicle Distance Controller	180

7.3	Interactive Co-evolution for Fuzzy Rule Extraction	184
7.3.1	Interactive Evolution	184
7.3.2	Co-evolution	186
7.3.3	Interactive Co-evolution of Interpretable Fuzzy Systems	186
7.4	Fuzzy Rule Extraction from RBF Networks	187
7.4.1	Radial-Basis-Function Networks and Fuzzy Systems . .	187
7.4.2	Fuzzy Rule Extraction by Regularization	191
7.4.3	Application Examples	196
7.5	Summary	203
8.	Fuzzy Knowledge Incorporation into Neural Networks	205
8.1	Data and <i>A Priori</i> Knowledge	205
8.2	Knowledge Incorporation in Neural Networks for Control	207
8.2.1	Adaptive Inverse Neural Control	207
8.2.2	Knowledge Incorporation in Adaptive Neural Control .	208
8.3	Fuzzy Knowledge Incorporation By Regularization	210
8.3.1	Knowledge Representation with Fuzzy Rules	210
8.3.2	Regularized Learning	213
8.4	Fuzzy Knowledge as A Related Task in Learning	216
8.4.1	Learning Related Tasks	216
8.4.2	Fuzzy Knowledge as A Related Task	216
8.5	Simulation Studies	217
8.5.1	Regularized Learning	218
8.5.2	Multi-task Learning	219
8.6	Summary	221
9.	Fuzzy Preferences Incorporation into Multi-objective Opti- mization	223
9.1	Multi-objective Optimization and Preferences Handling	223
9.1.1	Multi-objective Optimization	223
9.1.2	Incorporation of Fuzzy Preferences	225
9.2	Evolutionary Dynamic Weighted Aggregation	226
9.2.1	Conventional Weighted Aggregation for MOO	227
9.2.2	Dynamically Weighted Aggregation	228
9.2.3	Archiving of Pareto Solutions	230
9.2.4	Simulation Studies	230
9.2.5	Theoretical Analysis	237
9.3	Fuzzy Preferences Incorporation in MOO	247
9.3.1	Converting Fuzzy Preferences into Crisp Weights	247
9.3.2	Converting Fuzzy Preferences into Weight Intervals . .	249
9.4	Summary	252
	References	268
	Index	269
