Introduction

Russel Cooper, Gary Madden, Ashley Lloyd and Michael Schipp 1

PART I: Innovation and Competition in Online Markets

1 Pricing and Bundling of Shared Information Goods:

The Case of Cable Channels

Abraham Hollander and Thierno Diallo

Introduction	9
Notation and Assumptions	10
Pricing and Bundling with Identical Consumers	12
Heterogeneous Subscriber Preferences	13
Final Remarks	20
Appendix	21
References	23

2 The Development of Electronic Payments Systems

Ian Harper, Ric Simes and Craig Malam

Introduction	25
Trends in Electronic Payments	26
Development of Payments Card Systems	28
The Economics of Open and Closed Card Schemes	29
Evolution of Open and Closed Card Schemes	33
Empirical Evidence	35
Public Policy	38
The Future	39
References	40

3 Behavioral Frictions in Online Contracting:

Evidence from Yankee Auctions

Mira Slavova

Introduction	41
Data Set	43
Cluster Analysis	45
Bidding Behavior	48
Quantity Outcomes	54

Payment Outcomes	56
Conclusions	58
References	59
4 Online Channel Competition in a Differentiated Goods Market	
Sumi Cho and Sang-Ho Lee	
Introduction	61
Pure Online Competition	62
Online Channel Entry by an Offline Firm	65
Hybrid Firm with Blockaded Entry	65
Hybrid Firm with Free Entry	67
Asymmetric Quality Goods and Competition	69
Online Channel Competition with High-quality Goods	70
Online Channel Competition with Low-quality Goods	71
Comparison	73
Conclusion	74
References	75
5 Competition and Growth in Virtual Markets	
Gary Madden, Truong P. Truong and Michael Schipp	
Introduction	77
Alternative Equilibrium States	78
Firm Investment and Market Share	79
No Market Growth Game	80
Market Growth Game	85
Comparative-static Analysis	87
Conclusions	90
References	90
6 Mobile Network Prospects: A Multi-sided Platform Analysis of Competition	
Armando Calabrese, Massimo Gastaldi and Nathan Levialdi Ghiron	
Introduction	91
Market Demand	91
Incompatible Goods and Cournot Competition	92
Compatible Goods Case	93
Scenario 1	95
Multi-sided Service Markets and the OMTP Standard	97
Scenario 2	99
Operator Profit from Multi-sided Services	101
Scenario 3	102
Conclusions	109
References	110

PART II: Regulation, Pricing and Evaluation by Real Options
7 Real Options and Telecommunications Regulation

Kris Funston

Introduction	113
Neoclassical and Real Options Investment Theory	114
A Call Option from Investment Delay	115
Real Option Theory and Telecommunications Regulation	116
Uncertainty and Irreversibility of New Telecommunications	
Network Investment	117
Accounting for Call and Put Options in Telecommunications	119
Strategic Pre-emption and First-mover Advantage	120
The Real Option to Wait—Compensation for Lost Market Power?	121
The Truncation Problem and Real Option Theory	121
Conclusion	123
Appendix	124
References	125

8 A Discrete Real Options Approach to Access Pricing

Guillermo Lozano and José María Rodríguez

Introduction	129
The Model	130
An Illustration	134
Concluding Remarks	139
References	140

9 Optimal Pricing with Sunk Cost and Uncertainty

James Alleman and Paul Rappoport

Introduction	143
Literature Review	144
Regulation and Pricing	145
Sunk Costs	146
Regulatory Distortion	146
Real Options Pricing	147
Long-run Marginal and Sunk Costs	151
Conclusion	153
References	154

10 Efficient Spectrum Policy Using Real Options and Game Theoretic Methods

Tae-Ho Lyoo, Jongwook Jeong, Hyun-Jung Lee and Jeong-Dong Lee

Background	157
Theoretical Framework	158
Next Generation Convergence Services	161

Numerical Simulation	162
Concluding Remarks	165
References	165
11 A Real Options Approach to Investment Evaluation with a Network Externality	
Nadine Bellamy and Jean-Michel Sahut	
Introduction	167
Model Specification	168
Project Valuation	171
Numerical Illustration	172
Analyzing Mixed Scenarios	176
Conclusion	179
Appendix	179
Acknowledgement	182
Reference	182
PART III: Empirical Approaches to Market Analysis	
12 Mixed Logit Analysis of Carrier Market Share with Stated-preference Data	
Aniruddha Banerjee and Harold Ware	
Introduction	185
Revealed- versus Stated-preference	186
Modeling Behavior with Stated-preference Data	187
Ranked Choice and Stated-preference Surveys	189
Historical Data and Survey Limitations	189
Stated-preference Data Analysis with Mixed Logit Models	190
Telecommunications Demand Case Study	193
Stated-preference Survey Design	194
Estimation	196
Implications for Carrier Choice, Market Share and Choice Elasticity	198
Conclusions	201
References	201
13 Information Technology, Corporate Performance and Firm Size	
Yong Yeop Sohn and Hun-Wha Yang	
Introduction	203
Literature Review	204
Research Method	206
Estimation Results	209
Analysis by Firm Size	210
Conclusions	213
References	214

14 A Contingent Valuation of Terrestrial DMB Services

Sangkyu Byun, Hongkyun Bae and Hanjoo Kim

Introduction	215
Background	216
Contingent Valuation Survey	217
Compensating Variation Valuation of T-DMB Services	219
Estimation	220
Conclusion	224
Appendix: DMB Contingent Valuation Question	225
References	225

15 Consumer Preference for New Wireless Data Services

Jae-Hyeon Ahn, Sang-Pil Han, Kyoung-Yong Jee and Moon-Koo Kim

Introduction	227
Emerging Mobile Data Services in Korea	228
Consumer Preference for Emerging Services	229
Hierarchical Preference Structure	231
AHP Procedures	231
Results	233
Conclusions	237
Appendix: AHP Questionnaire	239
References	242

16 An International SME E-marketplace Networking Model

Jaechon Park and Jemin Yang

Introduction	245
Background	245
Technology	247
APEC Global B2B Interoperability Project	247
Repository System Architecture	248
Business Process Networking	249
Project Evaluation	252
Conclusion	256
References	256
