
Contents

On the Identification of Trend and Correlation in Temporal and Spatial Regression <i>Ludwig Fahrmeir, Thomas Kneib</i>	1
Estimating the Number of Clusters in Logistic Regression Clustering by an Information Theoretic Criterion <i>Guoqi Qian, C. Radhakrishna Rao, Yuehua Wu, Qing Shao</i>	29
Quasi Score and Corrected Score Estimation in the Polynomial Measurement Error Model <i>Hans Schneeweiss</i>	45
Estimation and Finite Sample Bias and MSE of FGLS Estimator of Paired Data Model <i>Weiqiang Qian, Aman Ullah</i>	59
Prediction of Finite Population Total in Measurement Error Models <i>Hyang Mi Kim, A.K.Md. Ehsanes Saleh</i>	79
The Vector Cross Product and 4×4 Skew-symmetric Matrices <i>Götz Trenkler, Dietrich Trenkler</i>	95
Simultaneous Prediction of Actual and Average Values of Response Variable in Replicated Measurement Error Models <i>Shalabh, Chandra Mani Paudel, Narinder Kumar</i>	105

VIII Contents

Local Sensitivity in the Inequality Restricted Linear Model <i>Huaizhen Qin, Alan T.K. Wan, Guohua Zou</i>	135
Boosting Correlation Based Penalization in Generalized Linear Models <i>Jan Ulbricht, Gerhard Tutz</i>	165
Simultaneous Prediction Based on Shrinkage Estimator <i>Anoop Chaturvedi, Suchita Kesarwani, Ram Chandra</i>	181
Finite Mixtures of Generalized Linear Regression Models <i>Bettina Grün, Friedrich Leisch</i>	205
Higher-order Dependence in the General Power ARCH Process and the Role of Power Parameter <i>Changli He, Hans Malmsten, Timo Teräsvirta</i>	231
Regression Calibration for Cox Regression Under Heteroscedastic Measurement Error — Determining Risk Factors of Cardiovascular Diseases from Error-prone Nutritional Replication Data <i>Thomas Augustin, Angela Döring, David Rummel</i>	253
Homoscedastic Balanced Two-fold Nested Model when the Number of Sub-classes is Large <i>Shu-Min Liao, Michael Akritas</i>	279
QR-Decomposition from the Statistical Point of View <i>Hilmar Drygas</i>	293
On Penalized Least-Squares: Its Mean Squared Error and a Quasi-Optimal Weight Ratio <i>Burkhard Schaffrin</i>	313
Optimal Central Composite Designs for Fitting Second Order Response Surface Linear Regression Models <i>Sung Hyun Park, Hyuk Joo Kim, Jae-Il Cho</i>	323
Does Convergence Really Matter? <i>Jörg Drechsler, Susanne Rässler</i>	341

OLS-Based Estimation of the Disturbance Variance Under Spatial Autocorrelation
Walter Krämer, Christoph Hanck 357

Application of Self-Organizing Maps to Detect Population Stratification
Nina Wawro, Iris Pigeot 367

Optimal Designs for Microarray Experiments with Biological and Technical Replicates
Rashi Gupta, Panu Somervuo, Sangita Kulathinal, Petri Auvinen 389

Weighted Mixed Regression Estimation Under Biased Stochastic Restrictions
Christian Heumann, Shalabh 401

Coin Tossing and Spinning – Useful Classroom Experiments for Teaching Statistics
Helmut Küchenhoff 417

Linear Models in Credit Risk Modeling
Thomas Nittner 427
