
List of Contents

1	Operative Set-up	1
■	Anterior Cruciate Ligament Lesions	
2	ACL Reconstruction Using a Bone-Patellar Tendon (BPT) Graft and Press-fit Fixation	7
3	ACL Reconstruction Using a Quadruple Semitendinosus and Gracilis Tendon (ST/G) Graft with No-Hardware Fixation	21
4	ACL Reconstruction Using a Central Quadriceps Free Tendon (CQFT) Graft and Cross-Pin Fixation	39
5	Revision Surgery	45
■	Classification	45
■	Technique for harvesting iliac-crest corticocancellous bone plugs	47
6	Revision of Widened Tibial Tunnel (Grade II and III Revisions)	49
■	Tibial tunnel reconstruction – semi-open arthroscopically assisted procedure	49
■	Tibial tunnel reconstruction – closed technique	56
7	Revision – Femoral and Tibial Tunnel Widening (Grade III)	59
8	Revision of Slackened but Intact Graft	65
■	Posterior Cruciate Ligament Lesions	
9	Augmentation in Recent PCL Tears	71
10	Posterior Cruciate Ligament (PCL) Reconstruction Using a Two-Tunnel Technique	77
11	Posterolateral Corner Reconstruction	89
12	Lateral Collateral Ligament (LCL) Replacement Using a Distally-Based Biceps Femoris Tendon Construct	97

■ **Meniscal Repair**

13 All-Inside Meniscal Repair Using the FasT-Fix™ Suture System 103

■ **Cartilage Lesions**

14 Cartilage-Stimulating Surgery – Microfracturing 111

■ **Osteochondritis Dissecans (OCD)**

15 Defect Filling 117

16 Fragment Reattachment 123

■ **Patellar Instability**

17 Surgery for Patellar Instability 127

■ **Osteoarthritis (OA) of the Knee**

18 Dome High Tibial Osteotomy (modified Maquet procedure) 139

19 Minimally Invasive Unicompartamental Knee Replacement 149
