## Degenerative/rheumatic disorders and deformities

<b>1</b>	<b>Posterior instrumentation of the cervical spine using the neon occipito-cervical system</b> .....	3
	MARCUS RICHTER and MICHAEL REITH	
	■ Introduction .....	3
	■ Principles and objectives of the neon occipito-cervical system .....	3
	■ Surgical instruments and implants .....	5
	■ Anaesthesia and positioning .....	6
	■ Surgical technique .....	7
	■ Postoperative management .....	14
	■ Errors, hazards, and complications .....	14
	■ References .....	14
<b>2</b>	<b>Treatment principles in rheumatoid instability of the cervical spine</b> ...	17
	TUGRUL KOCAK and KLAUS HUCH	
	■ Introduction .....	17
	■ Morphologic variations of rheumatic instability .....	17
	■ Clinical picture .....	18
	■ Imaging .....	19
	■ Non-surgical therapy of the rheumatoid cervical spine .....	19
	■ Surgical treatment .....	20
	■ Summary .....	23
	■ References .....	23
<b>3</b>	<b>Surgical techniques in cervical spinal canal stenosis</b> .....	27
	ULRICH KUNZ and CHRIS SCHULZ	
	■ Introduction .....	27
	■ Conservative treatment options .....	28
	■ Indications for surgical treatment .....	28
	■ Anterior procedures .....	28
	■ Posterior procedures .....	31
	■ References .....	33

<b>4</b>	<b>Techniques of thoracic and lumbar pedicle screws, lumbosacral fixation, and costotransversectomy</b> . . . . .	35
	BENJAMIN ULMAR	
	■ Historical development of pedicle screw instrumentation . . . . .	35
	■ Anatomical background . . . . .	35
	■ Implant components of the internal fixateur . . . . .	40
	■ Indications for pedicle screws and transpedicular instrumentation . . . . .	41
	■ Surgical approach and handling of the transpedicular instrumentation . . . . .	41
	■ Costotransversectomy (postero-lateral approach to the thoracic spine) . . . . .	42
	■ References . . . . .	42
<b>5</b>	<b>Fusion procedures for degenerative disorders of the lumbar spine – indications, techniques, and results</b> . . . . .	45
	WOLFRAM KÄFER, BALKAN ÇAKIR, and HEIKO REICHEL	
	■ Introduction . . . . .	45
	■ Low back pain – definition and epidemiology . . . . .	45
	■ Surgical techniques . . . . .	46
	■ Indications for lumbar fusion procedures . . . . .	52
	■ Outcome . . . . .	57
	■ Trends . . . . .	58
	■ Summary . . . . .	59
	■ References . . . . .	59
<b>6</b>	<b>Herniation of the lumbar intervertebral disc – when is surgery required?</b> . . . . .	63
	BALKAN ÇAKIR, HEIKO REICHEL, and WOLFRAM KÄFER	
	■ Background . . . . .	63
	■ Paresis . . . . .	64
	■ Pain . . . . .	66
	■ Type of disc herniation . . . . .	67
	■ Conclusion . . . . .	69
	■ References . . . . .	69
<b>7</b>	<b>Lumbar spinal canal stenosis – decompression with or without stabilization?</b> . . . . .	73
	ULRICH KUNZ and CHRIS SCHULZ	
	■ Introduction . . . . .	73
	■ Conservative treatment options . . . . .	74
	■ Indications for surgical treatment . . . . .	75
	■ Surgical technique . . . . .	75
	■ Summary . . . . .	77
	■ References . . . . .	78
<b>8</b>	<b>Spondylolisthesis – diagnosis and therapy</b> . . . . .	79
	THOMAS MATTES and HEIKO REICHEL	
	■ Introduction . . . . .	79
	■ Classification and grading . . . . .	79
	■ Etiology . . . . .	79
	■ Prevalence and localization . . . . .	80
	■ Diagnosis . . . . .	80

■	Conservative treatment .....	81
■	Surgical treatment .....	82
■	Summary .....	83
■	References .....	84
<b>9</b>	<b>Current concepts in scoliosis surgery</b> .....	<b>85</b>
	JENS SEIFERT and PETER BERNSTEIN	
■	Indications for surgery .....	85
■	Surgical approaches .....	85
■	Implants and fixation techniques .....	86
■	Correction principles .....	87
■	Combination of different techniques .....	89
■	Spondylodesis .....	90
■	New concepts in scoliosis surgery .....	90
■	References .....	91
<b>10</b>	<b>Syringomyelia – causes and treatment</b> .....	<b>93</b>
	UWE MAX MAUER	
■	Definition .....	93
■	Pathophysiology .....	93
■	Clinical history of posttraumatic syringomyelia .....	94
■	Diagnostics .....	94
■	Surgical management .....	95
■	References .....	96
<b>11</b>	<b>Computer navigation in spine surgery</b> .....	<b>97</b>
	THOMAS MATTES	
■	Introduction .....	97
■	Computed tomography (CT)-based navigation .....	98
■	Fluoroscopy-based navigation .....	99
■	Fluoroscopic 3-D navigation .....	99
■	Summary .....	100
■	References .....	100

## Trauma

<b>12</b>	<b>Treatment of cervical spine injuries</b> .....	<b>105</b>
	CHRISTOPH ULRICH	
■	Introduction .....	105
■	Diagnostics .....	105
■	Conservative treatment .....	107
■	Surgical treatment .....	107
■	Stabilization techniques .....	107
■	Upper cervical spine injuries .....	111
■	Lower cervical spine injuries .....	116
■	References .....	119

<b>13</b>	<b>Thoracic spine injuries – open versus endoscopic procedures</b> . . . . .	121
	MARKUS ARAND and MARKUS SCHULTHEISS	
■	Introduction . . . . .	121
■	Instrumentation system . . . . .	121
■	Operative technique . . . . .	122
■	Special considerations . . . . .	125
■	Summary . . . . .	126
■	References . . . . .	126
<b>14</b>	<b>Surgical treatment of fractures of the lumbar spine</b> . . . . .	129
	FLORIAN GEBHARD and MARKUS SCHULTHEISS	
■	Introduction . . . . .	129
■	Anatomy, pathophysiology and fracture classification . . . . .	129
■	Clinical findings . . . . .	129
■	Spinal stabilization techniques . . . . .	130
■	Clinical pathway . . . . .	130
■	Operative technique . . . . .	131
■	Treatment modalities of osteoporotic fractures . . . . .	132
■	Evidence-based spine surgery . . . . .	134
■	Critical evaluation . . . . .	135
■	Summary . . . . .	135
■	References . . . . .	135
<b>15</b>	<b>The role of vertebroplasty and kyphoplasty in the management of osteoporotic vertebral compression fractures</b> . . . . .	137
	RENÉ SCHMIDT	
■	Introduction . . . . .	137
■	Diagnostical work-up . . . . .	137
■	Indication . . . . .	139
■	Technique . . . . .	142
■	Conclusion . . . . .	143
■	References . . . . .	143
<hr/>		
<b>Tumor and infection</b>		
<b>16</b>	<b>Tumor lesions of the cervical spine – pitfalls and their solution</b> . . . . .	149
	KLAUS HUCH	
		149
■	Introduction . . . . .	149
■	Imaging . . . . .	149
■	Treatment options . . . . .	150
■	Pitfalls . . . . .	150
■	Conclusion . . . . .	153
■	References . . . . .	155

<b>17</b>	<b>Tumorous diseases of the thoracic and lumbar spine</b> . . . . .	157
	JÜRGEN NOTHWANG and CHRISTOPH ULRICH	
	■ Introduction . . . . .	157
	■ Incidence . . . . .	157
	■ Localization . . . . .	157
	■ Classification . . . . .	158
	■ Biomechanics . . . . .	158
	■ Differential diagnosis . . . . .	158
	■ Diagnostic work-up . . . . .	158
	■ Surgical management . . . . .	159
	■ Summary . . . . .	163
	■ References . . . . .	163
<b>18</b>	<b>Epidemiology and prognosis in spinal metastasis</b> . . . . .	165
	KLAUS HUCH	
	■ Introduction . . . . .	165
	■ Results of our retrospective cohort study . . . . .	166
	■ Discussion . . . . .	167
	■ References . . . . .	168
<b>19</b>	<b>Spondylitis and spondylodiscitis</b> . . . . .	169
	ROLF SOBOTTKE and PEER EYSEL	
	■ Introduction . . . . .	169
	■ Infection path . . . . .	169
	■ Pathogen spectrum . . . . .	170
	■ Epidemiology . . . . .	171
	■ Predisposition . . . . .	171
	■ Differential diagnoses . . . . .	171
	■ Diagnostics . . . . .	171
	■ Therapy . . . . .	179
	■ Prognosis . . . . .	184
	■ Conclusions for practise . . . . .	185
	■ References . . . . .	185

## Non-fusion technology

<b>20</b>	<b>Biomechanical characteristics of different non-fusion implants</b> . . . . .	191
	HANS-JOACHIM WILKE	
	■ Introduction . . . . .	191
	■ Methods of the performed in-vitro tests . . . . .	191
	■ Dynamic stabilization system (Dynesys) versus rigid fixators . . . . .	192
	■ Interspinous implants (X-Stop, Coflex, Wallis, Diam) . . . . .	193
	■ Total posterior-element replacement system (TOPS) . . . . .	194
	■ Total disc prostheses . . . . .	195
	■ Prosthetic disc nucleus (PDN) . . . . .	196
	■ Tissue engineered collagen matrix nucleus replacement . . . . .	196
	■ Summary . . . . .	197
	■ Limitations and conclusion . . . . .	198
	■ References . . . . .	198

---

<b>21</b>	<b>Interspinous devices – implants, indications and results</b> . . . . .	201
	RENÉ SCHMIDT and BALKAN ÇAKIR	
■	Introduction . . . . .	201
■	Implants . . . . .	201
■	Mode of action . . . . .	203
■	Indications . . . . .	204
■	Results . . . . .	205
■	Conclusion . . . . .	206
■	References . . . . .	206
<b>22</b>	<b>Lumbar total disc replacement – implants, indications, and results</b> . . .	209
	BALKAN ÇAKIR, RENÉ SCHMIDT, WOLFRAM KÄFER, and HEIKO REICHEL	
■	Background . . . . .	209
■	Postulated goals of TDR . . . . .	209
■	Implants and biomechanical concepts . . . . .	209
■	Inclusion and exclusion criteria for TDR . . . . .	211
■	Diagnostics . . . . .	212
■	Operative technique . . . . .	212
■	Clinical and radiological results . . . . .	212
■	Summary . . . . .	213
■	References . . . . .	214
