<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Problem Statement . . . . .	4
1.2	Contribution . . . . .	5
1.3	Thesis Outline . . . . .	7
<b>2</b>	<b>Spatial Awareness</b>	<b>9</b>
2.1	Context and Awareness . . . . .	9
2.2	Autonomous Embedded Systems . . . . .	12
2.2.1	Exchange of Self-Descriptions . . . . .	15
2.3	Mechanisms of Self-Organization . . . . .	16
2.3.1	Self-Organization in Space . . . . .	19
2.4	Spatial Context in Time . . . . .	20
2.5	An Architecture for Spatial Awareness . . . . .	23
2.6	Related Work . . . . .	26
2.6.1	Projects . . . . .	27
2.6.2	Comparison . . . . .	41
<b>3</b>	<b>Representation of Space</b>	<b>45</b>
3.1	Quantitative Representation . . . . .	46
3.1.1	Spatial Abstraction with Zones-of-Influence . . . . .	46
3.1.2	Reference Systems for Position and Direction . . . . .	49
3.2	Qualitative Representation . . . . .	51
3.2.1	Qualitative Abstractions of Space . . . . .	51
3.2.2	Recognition and Representation of Spatial Relations . . . . .	53
3.2.3	Static and Dynamic Spatial Relations . . . . .	56
3.2.4	Frames of Reference . . . . .	60
3.2.5	Spatiotemporal Relations . . . . .	61
3.3	Structure of Self-Descriptions . . . . .	66
3.3.1	Quantitative Spatial Properties . . . . .	67
3.3.2	Qualitative Spatial Relations . . . . .	70
3.4	Summary . . . . .	72

<b>4 Distributed Spatial Reasoning</b>	<b>75</b>
4.1 Overview of Qualitative Approaches . . . . .	75
4.1.1 Properties and Closures of Binary Relations . . . . .	77
4.1.2 Compositional Reasoning . . . . .	79
4.2 Reasoning about Positional and Directional Relations . . . . .	80
4.2.1 Related Approaches . . . . .	81
4.2.2 Composition of Positional Relations . . . . .	82
4.3 Spatial Relationship Inference and Distribution . . . . .	87
4.3.1 General Concept by Exploiting Relation Properties . . . . .	87
4.3.2 Distribution Algorithm Using Compositional Inference . . . . .	92
4.4 Simulation Results . . . . .	96
4.5 Findings and Discussion . . . . .	103
<b>5 Rule-Based Spatial Awareness</b>	<b>105</b>
5.1 Achieving Spatially Aware Behavior . . . . .	106
5.1.1 Reasoning with Rules . . . . .	106
5.1.2 Using a Rule Engine . . . . .	108
5.2 Rule-Based Qualitative Spatial Reasoning . . . . .	109
5.2.1 Inferring Relations and Application-Level Actions . . . . .	112
5.3 Proof of Concept . . . . .	115
5.4 Summary and Open Issues . . . . .	119
<b>6 Zones-of-Influence Framework</b>	<b>121</b>
6.1 Architecture . . . . .	122
6.1.1 Design Considerations . . . . .	122
6.1.2 Architecture Overview . . . . .	123
6.1.3 Runtime Platform . . . . .	126
6.2 Components . . . . .	127
6.2.1 Digital Artifact Service . . . . .	127
6.2.2 Zones-of-Influence Service . . . . .	130
6.2.3 Relations Service . . . . .	135
6.3 Runtime Behavior . . . . .	140
6.4 Discussion . . . . .	143
<b>7 Framework Evaluation</b>	<b>147</b>
7.1 Development of Spatially Aware Applications . . . . .	147
7.2 Application Scenarios . . . . .	149
7.2.1 Vibro-Tactile Space Awareness . . . . .	151
7.2.2 Focus/Nimbus Awareness . . . . .	158

Contents	XIII
7.2.3 Spatiotemporal Awareness . . . . .	163
7.3 Comparison and Discussion . . . . .	169
<b>8 Conclusion</b>	<b>177</b>
8.1 Summary . . . . .	179
8.2 Outlook . . . . .	185
<b>Bibliography</b>	<b>191</b>
