Foreword	V
Acknowledgements	VII
Abstract	IX
Contents	XI
List of Figures	XVII
List of Tables	XXI
Abbreviations	XXIII
1 Introduction	1
1.1 Field of Investigation	2
1.2 Research Problem	4
1.3 Research Questions and Objectives	7
1.4 Methodology	8
1.5 Thesis Structure	12
2 Theoretical Framework	15
2.1 Ubiquitous Computing	15
2.1.1 Definition	15
2.1.2 Building Blocks	17
2.1.3 Technologies	18
2.1.4 Radio Frequency Identification (RFID)	20
2.1.4.1 Standards	20
2.1.4.2 RFID Tag and Data	21
2.1.4.3 Capacity	22
2.1.4.4 Shapes and Form	22
2.1.4.5 Frequencies	23
2.1.4.6 Transmission	24
2.1.4.7 Readers and Connectivity	25

2.1.4.8	Cost.....	26
2.1.5	Near Field Communication (NFC).....	27
2.1.5.1	NFC Forum Technology Architecture	27
2.1.5.2	Mobile NFC Architecture.....	29
2.1.5.3	Available NFC Phones	30
2.1.5.4	Developing with NFC	32
2.1.5.5	NFC Tags	33
2.1.6	RFID and NFC Information Systems.....	34
2.2	Ubiquitous Computing Technologies and the Consumer	35
2.2.1	Categorization of Applications Using the Example of RFID	35
2.2.2	User Awareness and Perception of RFID	37
2.3	The Importance of Prototyping	44
3	Human Computer Interaction and Technology Acceptance.....	47
3.1	Human Computer Interaction	47
3.1.1	Human Aspects	48
3.1.1.1	The End-User	48
3.1.1.2	Behavioral Constraints of the End-User.....	49
3.1.1.3	Everyday Tasks	50
3.1.1.4	Cognitive Limitations.....	51
3.1.1.5	Context-Sensitive Applications to Limit the Cognitive Load.....	53
3.1.2	Human Computer Interface.....	54
3.1.2.1	Multimodal Interaction.....	55
3.1.2.2	Haptic Interfaces	56
3.1.2.3	Affordances	58
3.1.2.4	The Interaction Design of an Everyday Task.....	58
3.1.2.5	Interaction between Physical Objects and Mobile Devices	59
3.1.3	Summary: Preliminary Set of Requirements.....	61
3.2	Technology Acceptance.....	64
3.2.1	Technology Acceptance Evaluation in Ubiquitous Computing.....	64
3.2.2	Innovation Adoption	65
3.2.3	Technology Acceptance Models	69
3.2.3.1	Social Cognitive Theory (SCT).....	70
3.2.3.2	Theory of Reasoned Action / Theory of Planned Behaviour (TRA/TPB)...	70

3.2.3.3	Technology Acceptance Model (TAM)	71
3.2.3.4	Task-Technology Fit (TTF)	72
3.2.3.5	Motivational Model (MM)	73
3.2.3.6	Unified Theory of Acceptance and Use of Technology (UTAUT)	73
3.2.3.7	Critical Assessment of Acceptance Models	83
3.2.4	Summary: Technology Acceptance and Implications.....	84
4	Designing an Ubiquitous Computing Application Development and Evaluation Process Model (UCAN)	87
4.1	Ubiquitous Computing Application Development	87
4.1.1	Determining Initial Requirements	88
4.1.2	Challenges	90
4.1.3	End-User Integration	91
4.1.4	Prototypes.....	92
4.1.5	System Engineering and Prototyping.....	94
4.2	Evaluating Ubicomp Applications	95
4.2.1	Challenges	95
4.2.2	Evaluating Prototypes	96
4.2.3	Evaluation in Specific Prototype Phases	98
4.3	A-priori: The Ubiquitous Computing Application Development and Evaluation Process Model (UCAN)	103
4.4	Selection of Case Studies.....	104
4.4.1	NFC Applications.....	104
4.4.1.1	Technology Push.....	105
4.4.1.2	Market Pull.....	105
4.4.2	Selection Criteria.....	105
4.4.3	Motivation	107
4.4.4	Conducting the Case Studies.....	108
4.4.5	Overview	109
5	From Initial Idea to Low-Fidelity Prototype: Easymeeting and the Mobile Prosumer.....	111
5.1	Easymeeting: Meeting Room Management System.....	111
5.1.1	Vision of a Motivating Application	112

5.1.2	General Problem: Ubiquitous Computing in a Work Environment.....	113
5.1.3	Initial Idea	113
5.1.4	Evaluation of the Initial Idea.....	113
5.1.5	Refined Idea	114
5.1.6	Low-Fidelity Prototype	117
5.1.7	Evaluation of the Low-Fidelity Prototype.....	120
5.1.7.1	Research Methodology.....	120
5.1.7.2	Sample.....	121
5.1.7.3	Data Collection and Data Coding.....	121
5.1.8	Evaluation Results of the Low-Fidelity Prototype.....	122
5.1.8.1	Evaluation Results—Qualitative with "Talking out Loud" Method.....	122
5.1.8.2	Evaluation Results—Quantitative According UTAUT Items.....	123
5.1.9	Refined Use Case	126
5.1.10	Summary of the Results—Easymeeting.....	128
5.1.10.1	Improve and Theorize about the Developed Process Model (UCAN)...	128
5.1.10.2	Preparing Design Guidelines.....	130
5.2	Mobile Prosumer: Smart Product Information System at the Point of Sale..	132
5.2.1	Vision of a Motivating Application	134
5.2.2	General Problem: Smart Products and Information Services.....	134
5.2.2.1	Differences in Online and Offline Shopping.....	135
5.2.2.2	Smart Products—Bridging the Gap of Offline and Online Information....	135
5.2.2.3	Demand for RFID-based Information Services at the Point of Sale	137
5.2.3	Initial Idea	138
5.2.4	Evaluation of the Initial Idea.....	139
5.2.5	Refined Idea	139
5.2.6	Low-Fidelity Prototype	140
5.2.7	Evaluation of the Low-Fidelity Prototype.....	141
5.2.7.1	Research Methodology.....	142
5.2.7.2	Sample.....	143
5.2.7.3	Data Collection and Data Coding.....	144
5.2.8	General Evaluation Results	144
5.2.8.1	Experiences and Attitude towards Shopping	144
5.2.8.2	Evaluating the Initial Idea—Paper-based Concept Test	145
5.2.9	Low-Fidelity Prototype Evaluation.....	147
5.2.9.1	Low-Fidelity Prototype Evaluation—Focus Group 1: Consumers	147

5.2.9.2	Low-Fidelity Prototype Evaluation—Focus Group 2: Sales Assistants	147
5.2.10	Refined Use Case	148
5.2.11	Summary of the Results – Mobile Prosumer	151
5.2.11.1	Improve and Theorize about the Developed Process Model (UCAN)...	151
5.2.11.2	Preparing Design Guidelines.....	153
6	Working Prototype: An NFC-based Mobile Phone Ticketing System	155
6.1	From the Initial Idea to the Working Prototype	156
6.2	Working Prototype.....	159
6.3	Evaluation of the Working Prototype	161
6.3.1	Sample.....	163
6.3.2	Preparing the Research Design	164
6.3.2.1	Questionnaire Concept	164
6.3.2.2	Adaptation of Original UTAUT Constructs.....	164
6.3.2.3	Summary of Items and Constructs	173
6.3.2.4	Determining Measurement Points.....	174
6.3.3	Data Collection.....	175
6.3.4	Data Processing	176
6.4	Data Analysis and Interpretation	177
6.4.1	Data Analysis	177
6.4.2	PLS Analysis	178
6.4.3	Interpretation	183
6.4.3.1	Behavioural Intention.....	183
6.4.3.2	Performance Expectancy.....	186
6.4.3.3	Effort Expectancy.....	187
6.4.3.4	Social Influence.....	187
6.4.3.5	Attitude towards Using Technology	188
6.4.3.6	Self Efficacy	188
6.4.3.7	Anxiety	188
6.4.3.8	Facilitating Conditions	188
6.4.4	PLS Multi-Group Comparisons	189
6.4.5	Further Results	189
6.4.6	Direct Limitations	191
6.5	Summary of the Results.....	193

6.5.1	Improve and Theorize about the Developed Process Model (UCAN).....	193
6.5.1.1	Benefits of the Process	193
6.5.1.2	Limitations of the Process	194
6.5.1.3	Evaluation of the Research Instrument: Quantitative Survey	194
6.5.2	Preparing Design Guidelines.....	195
7	Conclusion, Limitations, and Future Research	197
7.1	Conclusion.....	197
7.1.1	Evaluation of the Case Studies.....	198
7.1.2	Technological Comparison	199
7.1.3	Improving UCAN.....	201
7.1.4	Design Guidelines for NFC-based Ubiquitous Computing Applications	207
7.1.5	Contributions of the Analysis.....	214
7.2	Limitations and Future Research	217
7.2.1	Limitations	217
7.2.2	Future Research.....	218
	Bibliography.....	221
	Appendix	239
