

Table of contents

I) Introduction	1
II) Literature review.....	5
<i>II.1 Organizational learning</i>	5
II.1.1) Providing definitions and links	5
II.1.2) From “individual” to “organizational” learning	6
II.1.3) From Organizational learning to knowledge management	9
II.1.3.1) The link between organizational learning, knowledge creation, and knowledge management	9
II.1.3.2) Organizational learning and knowledge management	11
II.1.4) The link to best practice identification and development	13
II.1.4.1) The notion of “best practice”	13
II.1.4.2) Best practice enhancement as an ongoing process	16
<i>II.2) The transfer of Knowledge and Best Practices</i>	19
II.2.1) Problems regarding the transfer of best practices	20
II.2.2) General insights into the transfer of best practices.....	21
II.2.3) Main reasons for and enablers of knowledge and best practice transfer	23
<i>II.3) Communities of Practice (CoPs)</i>	24
II.3.1) The notion of CoPs and their link to best practices	25
II.3.2) Nurturing a community of practice.....	28
II.3.2.1) Principle 1: Design a favorable frame in which CoPs can evolve	28
II.3.2.2) Principle 2: Know the “inside” perspectives of the community and build dialogues with perspectives “outside” the community.....	31
II.3.2.3) Principle 3: Invite different levels of participation within the community	40
II.3.2.4) Principle 4: Develop both public and private community spaces	45
III) Model building and developing research hypothesis	53
<i>III.1) Presentation of the research model</i>	53
<i>III.2) Development and presentation of the research hypotheses</i>	62

III.2.1) Linking existing theory to the research hypotheses.....	62
III.2.1.1) Towards the 1 st research hypothesis – related to CoP objectives	62
III.2.1.2) Towards the 2nd research hypothesis – related to CoP results.....	63
III.2.1.3) Towards the 3 rd and 4 th research hypothesis – related to sponsorship and leadership	72
III.2.1.4) Towards the 5th research hypothesis – related to routinization of activities	76
III.2.1.5) Towards the 6th research hypothesis – related to a risk-free environment	78
IV) Methodology.....	85
<i>IV.1) The positivist and constructivist paradigms</i>	<i>85</i>
IV.1.1) Positivism.....	86
IV.1.2) Constructivism	87
IV.1.3) Positioning of the current research	89
<i>IV.2) Quantitative and Qualitative research.....</i>	<i>93</i>
IV.2.1) Research objective	93
IV.2.2) Characteristics of and differences between quantitative and qualitative methods.....	93
IV.2.3) Interaction with participants	95
IV.2.4) Researcher bias: a qualitative research shortcoming	96
<i>IV.3) Research design.....</i>	<i>97</i>
<i>IV.4) Research setting.....</i>	<i>98</i>
IV.4.1) Data collection	104
<i>IV.5) Data analysis.....</i>	<i>109</i>
IV.5.1) Between a loose and a tight analysis approach.....	111
IV.5.2) Linking data collection to data analysis.....	112
IV.5.3) Data analysis across a multiplicity of CoPs.....	113
<i>IV.6) The qualitative questionnaire and semi-structured interview.....</i>	<i>121</i>
IV.6.1) The qualitative type questionnaire	121
IV.6.2) The semi-structured interview	124

IV.6.3) Questionnaire pre-testing.....	126
IV.6.4) Semi-structured interview pre-testing.....	127
IV.6.5) Strengths and weaknesses of theory building from a multiplicity of CoP cases	128
V) Research findings	131
<i>V.1) Three “successful” configurations of CoPs</i>	<i>131</i>
V.1.1) The main reasons for failure of CoPs.....	141
V.1.2) Discussion of the 1 st set of research findings.....	143
<i>V.2) An in-depth understanding of the 6 success factors regarding the development and sharing of best practices in CoPs</i>	<i>148</i>
V.2.1) Clear objectives	148
V.2.2) Routinization of activities	153
V.2.3) Leadership	167
V.2.4) Risk-free environment.....	174
V.2.5) Sponsorship	177
V.2.6) CoP results	192
V.2.7) Summary of the 2 nd set of research findings	196
V.2.8) Discussion on the 2 nd set of research findings and future research propositions	205
Appendices	221
References	238
