Deutsche Gesellschaft für Technische Zusammenarbeit (Hrsg.) **Running dry?**

Climate change in drylands and how we can tackle it oekom verlag, München 2009 222 Seiten in Farbe, 29,90 Euro, ISBN 978-3-86584-184-4

Table of contents

	Acknowledgements	8
	Foreword	9
	Introduction	11
1	Executive Summary	13
2	Contribution of drylands to climate change	21
	Carbon dioxide and other greenhouse gas emissions from drylands The role of land use and land-use change in local and	22
	regional climate change	26
	2.2.1 Drivers of climate change in Africa's drylands	29
3	Climate change in dryland regions	33
3.1	Recent climate change	35
	3.1.1 Global scale	35
	3.1.2 Africa	36
	3.1.3 Asia	38
	3.1.4 Central and South America	39
3.2	Climate projections	39
	3.2.1 Global scale	40
	3.2.2 Africa	43
	3.2.3 Asia	48
	3.2.4 Central and South America	50

4	Impacts of climate change on drylands	53
	Climate change – an additional pressure Drylands – particularly vulnerable to the adverse effects	54
	of climate change	56
	Impacts of climate change on desertification	59
4.4	Impacts of climate change on dryland ecosystems and biodiversity	60
4.5	Impacts of climate change on freshwater resources in drylands	63
	4.5.1 Global scale	63
	4.5.2 Africa	63
	4.5.3 Asia	64
	4.5.4 Central and South America	66
4.6	Impacts of climate change on agriculture	66
	4.6.1 Global scale	66
	4.6.2 Africa	72
	4.6.3 Asia	80
	4.6.4 Central and South America	81
5	Climate-change mitigation through sustainable	
	land management	83
5.1	What does mitigation of climate change mean?	85
	What does mitigation of climate change mean? Challenges for mitigation of climate change	85 87
5.2		
5.2	Challenges for mitigation of climate change	87
5.2	Challenges for mitigation of climate change Mitigation potential and options in forestry	87
5.2 5.3	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation	87 91
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands?	87 91 94
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture	87 91 94 100
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands	87 91 94 100 104
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands	87 91 94 100 104 108
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management	87 91 94 100 104 108 109
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management	87 91 94 100 104 108 109 117
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands	87 91 94 100 104 108 109 117 120
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils	87 91 94 100 104 108 109 117 120 121
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management	87 91 94 100 104 108 109 117 120 121
5.25.35.4	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils Land-use change, afforestation, agroforestry	87 91 94 100 104 108 109 117 120 121 121
5.25.35.45.5	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils Land-use change, afforestation, agroforestry Bioenergy	87 91 94 100 104 108 109 117 120 121 121 122 130
5.25.35.45.5	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) — an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils Land-use change, afforestation, agroforestry Bioenergy 5.5.2 Co-benefits of carbon sequestration in drylands	87 91 94 100 104 108 109 117 120 121 121 122 130 132
5.25.35.45.5	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils Land-use change, afforestation, agroforestry Bioenergy 5.5.2 Co-benefits of carbon sequestration in drylands Carbon finance in the AFOLU sector	87 91 94 100 104 108 109 117 120 121 121 122 130 132 135
5.25.35.45.5	Challenges for mitigation of climate change Mitigation potential and options in forestry 5.3.1 Reducing emissions from deforestation and forest degradation (REDD) – an option for more investment in drylands? Mitigation potential and options in agriculture Carbon sequestration in drylands 5.5.1 Mitigation practices for carbon sequestration in drylands Improved cropland management Improved grazing land management Restoration of degraded lands Erosion management Reclamation of salt-affected soils Land-use change, afforestation, agroforestry Bioenergy 5.5.2 Co-benefits of carbon sequestration in drylands Carbon finance in the AFOLU sector 5.6.1 Clean Development Mechanism (CDM)	87 91 94 100 104 108 109 117 120 121 122 130 132 135

6	Adaptation to climate change	143
6.1	What does adaptation to climate change mean?	145
6.2	Challenges for adaptation	147
6.3	Adaptation to climate change and sustainable development	149
	6.3.1 How are they interrelated?	149
	6.3.2 Integration of adaptation to climate change into development policies	151
6.4	Adaptation to climate change in drylands	157
	6.4.1 Building on local and traditional knowledge	168
	6.4.2 Developing and applying new measures –	
	'Climate insurance' as a form of risk management	170
	6.4.3 Overcoming the 'convention egoism':	170
<i>6</i> E	a challenge for effective adaptation in drylands	172 175
0.5	Financing adaptation 6.5.1 Official Development Assistance (ODA)	175
	6.5.2 The Adaptation Fund	173
	6.5.3 GEF adaptation funds	179
	Least Developed Countries Fund (LDCF) and	.,,
	National Adaptation Programmes of Action (NAPAs)	180
	The Special Climate Change Fund (SCCF)	182
	Strategic Priority on Adaptation (SPA) under the GEF Trust Fund	184
	Community-Based Adaptation Programme	185
	6.5.4 The World Bank's Pilot Programme for Climate Resilience (PPCR)	185
7	Linkages between mitigation and adaptation in drylands	187
