

# Contents

Preface.....	v
Contributors .....	xi
<b>Part I Dynamics and Complexity of Intercellular Networks</b>	
<b>Integrative Synaptic Mechanisms of the Neural Network .....</b>	3
Shigetada Nakanishi	
<b>The Molecular and Cellular Design of Networks in Motion.....</b>	11
Sten Grillner, Peter Wallén, and Russell Hill	
<b>Bacterial Complexity: More Is Different on All Levels.....</b>	25
Eshel Ben-Jacob	
<b>How Animals Get Their Skin Patterns: Fish Pigment Pattern as a Live Turing Wave .....</b>	37
Shigeru Kondo	
<b>Characterization and Application of Natural Light-Sensitive Proteins.....</b>	47
Jens Loos and Georg Nagel	
<b>Systems Biology of Mammalian Circadian Clocks .....</b>	57
Hiroki R. Ueda	
<b>Toward Understanding How the Immune System Establishes a Diverse Yet Self-Tolerant T-Cell Repertoire: Stepwise Roles of Thymic Microenvironments .....</b>	71
Takeshi Nitta and Yousuke Takahama	

<b>The Mechanisms of Motor Programming for Learned Vocalization in Songbirds.....</b>	83
Hisataka Fujimoto, Taku Hasegawa, Ryosuke Matsui, Kentaro Abe, and Dai Watanabe	
<b>Dynamic Model of the Basal Ganglia Functions and Movement Disorders .....</b>	91
Atsushi Nambu	
<b>Part II Integrative Mechanism of Intracellular Information Networks</b>	
<b>A Posttranslational Chemical Circadian Oscillator in Cyanobacteria .....</b>	101
Hideo Iwasaki	
<b>The Apoptotic Signaling Network Dynamically Interprets the Outputs of Individual Signaling Pathways in an Early Analog and Late Digital Manner.....</b>	111
Kevin A. Janes, H. Christian Reinhardt, and Michael B. Yaffe	
<b>Specific Features of Transient Ras and Sustained Rap1 Activation.....</b>	121
Yu-ichi Ozaki, Shinsuke Uda, and Shinya Kuroda	
<b>Control and Alteration of Protein Traffic in the Cell .....</b>	129
Toshiya Endo	
<b>Plant Functional Genomics Based on Integration of Metabolomics and Transcriptomics: Toward Plant Systems Biology.....</b>	135
Kazuki Saito	
<b>A Possible Role of Homeostasis Between Monomeric and Filamentous Actin in Filament Nucleation Revealed by Pharmacokinetic Modeling.....</b>	143
Naoki Watanabe and Chiharu Higashida	
<b>Molecules, Networks, and Memory.....</b>	151
Upinder S. Bhalla	
<b>Systems Biology Meets Single-Cell Physiology: Role of a Positive-Feedback Signal Transduction Network in Cerebellar Long-Term Synaptic Depression .....</b>	159
Keiko Tanaka and George J. Augustine	
<b>Computational Models of Cerebellar Long-Term Memory.....</b>	169
Hideaki Ogasawara and Mitsuo Kawato	

<b>Biogenesis and Function Mechanisms of Micro-RNAs and Their Role as Oncogenes and Tumor Suppressors.....</b>	183
Soken Tsuchiya, Kazuya Terasawa, Ryo Kunitomo, Yasushi Okuno, Fumiaki Sato, Kazuharu Shimizu, and Gozoh Tsujimoto	
<b>Part III Dysfunction of Information Networks and Related Diseases</b>	
<b>The Pathogenetic Significance of Deregulated Transcription Factors in Hematological Malignancies .....</b>	193
Masahiro Nakagawa, Susumu Goyama, Motoshi Ichikawa, and Mineo Kurokawa	
<b>Ultradian Oscillation Networks in Somite Segmentation and Other Biological Events .....</b>	199
Yasutaka Niwa, Hiromi Shimojo, and Ryoichiro Kageyama	
<b>The Cellular Basis of <i>Dictyostelium</i> Morphogenesis .....</b>	209
Cornelis J. Weijer	
<b>Metabolic Information Highway: Interorgan Metabolic Communication Via the Autonomic Nervous System.....</b>	221
Hideki Katagiri	
<b>Involvement of the CCR4-NOT Deadenylase Complex in the Control of Cell Growth .....</b>	229
Masahiro Morita, Kentaro Ito, Toru Suzuki, and Tadashi Yamamoto	
<b>Reconstruction of Nuclear Reprogramming by Defined Factors .....</b>	239
Shinya Yamanaka	
<b>Index.....</b>	243
